Open Source

The overall CUBIST prototype will be relased as open source on GiHub under the Apache 2.0 Licence. The prototype consists of three components developed by the partners SAP, SHU and ECP, which are published independently. There are:

1. SAP, NowaSearch: This component is currently under review in an SAP-internal approval process before it can be published. It will then be published at the SAP section of GitHub, i.e. https://github.com/SAP.

2. SHU, FCAService: This component can be found at https://github.com/acesco1/rdf2fca-service

3. ECP, CUBIX: This component can be found at https://github.com/ksiomelo/cubix
