1 Summary of Key Information

Acting Head of School
Professor Gavin Gibson    Room CM G.03
G.J.Gibson@hw.ac.uk

Director of Learning & Teaching
Professor Jennie Hansen    Room CM T.22
J.Hansen@hw.ac.uk

Director of Research
Professor Gabriel Lord       Room CM S.12
G.J.Lord@hw.ac.uk

HEADS OF DEPARTMENT
Actuarial Mathematics & Statistics
Professor Gavin Gibson    Room CM G.03
G.J.Gibson@hw.ac.uk

Computer Science
Professor Nick Taylor    Room EM 1.62
N.K.Taylor@hw.ac.uk

Mathematics
Professor Bryan Rynne    Room CM T.10
B.P.Rynne@hw.ac.uk

KEY LOCATIONS
The School of Mathematical & Computer Sciences (MACS) is located in two buildings to the north of the campus, the Earl Mountbatten Building (EM) and the Colin Maclaurin Building (CM).

SCHOOL OFFICE – EM 1.25
The School Office counter is open Monday – Friday, 10am – 4pm. This office is the initial point of enquiry for students and most University forms can be obtained here e.g. change of course registration, programme transfer. Student forms are also available on-line from Registry’s website at www.hw.ac.uk/registry/forms.htm. Standard certification letters and academic transcripts should be obtained from the Student Service Centre. However, the School Office can also advise on requesting certification letters for specific purposes such as for sponsors.

ACCESS TO BUILDINGS
The Earl Mountbatten and Colin Maclaurin Buildings are open from 8am to 7 pm Monday to Friday. In addition, students studying on Computer Science programmes can request an access card via the School Office (EM1.25) for EMB which will allow them access to that building from 8am until 10pm including weekends. Anyone working after 7pm must enter and exit via the main door at the north side of EMB and register both in and out in the Out-of-Hours register there. All other routes are time locked after 7pm on weekdays and all day on
Saturdays and Sundays. Nobody is allowed to remain in the buildings after 10 pm without specific authorisation.

2 Welcome and Introduction

2.1 Welcome from the Principal of Heriot-Watt University

I am delighted to welcome you as a student of Heriot-Watt University!

Heriot-Watt University has a well-earned reputation as Scotland’s most international and outward-looking University. With three campuses in Scotland (attended by a high percentage of students from across the world), a Campus in Dubai, a new Campus in Malaysia and Learning Partner institutions across the world, we have a vibrant and diverse learning culture which is unique and unmatched by other universities in the United Kingdom. We are keen to give our students the opportunity to develop an international dimension to their studies which will enhance their opportunities for future growth.

Students at all our campus locations are an important part of our global community and I very much hope you enjoy your time with us.

Professor Steve Chapman  
Principal and Vice-Chancellor

3 General Information about the School/Institute

The School is a collegiate grouping of three discipline areas: Actuarial Mathematics & Statistics, Computer Science and Mathematics. It occupies two adjacent buildings on the campus; the Earl Mountbatten (EM) Building and the Colin Maclaurin (CM) Building, both offering modern facilities. There are currently approximately 80 academic staff, 800 undergraduate students, 150 MSc students and 100 research postgraduate students.

Further information for students is available at: [http://www.macs.hw.ac.uk/home](http://www.macs.hw.ac.uk/home)

3.1 Computing facilities, labs and lecture rooms within the School

The following rooms are particularly relevant to MACS students -

Ground Floor  
EM G.44 - Tutorial Room  
EM G.45 - Tutorial Room  
EM G.46 - Computer Suite - Multimedia Laboratory  
EM G.47 - Computer Suite - Multimedia Laboratory  
EM G.61 - Tutorial Room  
CM G.01 - Lecture Room

First Floor  
EM 1.25 – School Office  
EM 1.33 - MACS Computer Systems Help Desk  
EM 1.70 - Tutorial Room  
EM 1.82 - Lecture Room  
EM 1.83 - Lecture Room

Second Floor  
EM 2.44 - Lecture Room
EM 2.45 –Computer Suite - Windows Laboratory  
EM 2.50 - Computer Suite – MACS Linux Laboratory  
EM 2.52 - Computer Suite – HWU Desktop Service  
CM S.01 - Lecture Room  

Third Floor  
EM 3.02 - Tutorial Room  
EM 3.03 - Tutorial Room  
EM 3.06 - Lecture Room  
EM 3.07 - Lecture Room  
EM 3.36 - Lecture Room

3.2 IT Facilities
All students have access to IT facilities managed centrally by Information Technology (IT). The University Desktop Service for students can be found within centrally timetabled labs and the Library. A centrally timetabled lab is located in the Earl Mountbatten Building room EM 2.52.

The IT help desk can be found in the library on the Edinburgh campus – the desk is next to the library service desk on the first floor. The desk will not be manned at all times – but you can contact IT by phone, email or the portal and appointments can be made to see helpdesk staff if required.

Contact options:

Portal: https://support.hw.ac.uk  
Email: ITHelp@hw.ac.uk  
Telephone (from off campus): +44 (0) 131 451 4045  
Telephone extension (on campus): 4045  
Personal Visit Library – 1st floor (if the helpdesk is unattended please contact us to arrange an appointment)

In addition, specialist IT facilities are provided in-house by MACS. These are used principally by students following Computer Science or IT programmes. The rest of this section applies to users of these MACS based facilities - also known as “the MACS Network”.

These are available in the School Information System, at:

http://www.macs.hw.ac.uk/dept/facil/rules.htm

Use of the computing facilities is governed by University Regulation 29, which applies mainly to central university facilities, and by the terms and conditions set out in a similar document applicable specifically to the school (see the form ‘Computer Regulations and Authorization’).

Our school network is connected to the Campus Network, which is in turn connected to the UK academic network JANET. Thus the JANET acceptable use policy also applies.

Users are authorised to use certain facilities at certain times, as appropriate to their employment or course of study. Many lab facilities are booked at certain periods for certain groups, or may operate under a scheme where certain groups
have priority without excluding others from using a free workstation. Details are posted in the appropriate areas.

Access to workstations is available during ‘normal working hours’ as defined in Section 1 of this handbook. Access during certain periods outwith normal working hours may be permitted to key holders - currently members of staff, postgraduate and final year honours students.

As mentioned above, users are bound by regulations in respect of their use of computing resources. Users should also be aware that they are also bound by the law of the land in this area, specifically the Data Protection Act and the Computer Misuse Act. The latter makes it a criminal offence to make, or attempt to make, unauthorised access to computing facilities or datasets.

The School and the University take a very serious view of this type of activity, or any of the other activities loosely known as ‘hacking’. Any action of this nature is considered at the very least to be a serious disciplinary offence, and at most a criminal offence, which may be the subject of criminal proceedings. You have been warned!

Other operational procedures which users MUST observe include:

- No food or drink (other than bottled water) should be consumed in any laboratory.
- Do not boot a computer from any removable media of your own.
- Do not install unauthorised software, or alter any system files on disk.
- Do not attempt to move any computer equipment without permission.
- Users must log out after use.
- Do not attempt to connect your own computer or other device to our wired network without explicit permission.

The computing facilities are provided in support of users’ employment or course of study at Heriot-Watt. These facilities will be denied if abuses take place. Examples of abuse include:

- Importing large ‘recreational’ files (programs, graphical images, etc.) which eat up disk space.
- Laser printing of personal or non-essential documents.
- Importing and/or display of offensive images.
- Excessive recreational usage not connected with your coursework.

Users must not cause or allow their accounts to be used in any way which may tarnish the good name and reputation of the school or the university. The university holds individual users responsible for unofficial information published electronically by them, and professional codes of behaviour are expected.

Particularly unacceptable practices, likely to lead to disciplinary proceedings, are abusive or libellous mail or news articles, or any activity resulting in pornographic material being imported, displayed, or published within the university.
3.2.2 File Security
In a distributed, multi-user network environment such as ours, it is relatively easy to gain access to files and directories belonging to other users. In fact, the default is that files created by student users (in ‘home’ directories) can be read (and hence copied) but not written (or altered) by all other legitimate users of our systems. In most situations this is convenient, in some it is necessary.

However, the school is concerned to point out to students the dangers of plagiarism of course work. Unscrupulous students have been known to take copies of other users’ coursework files for their own use. Would-be perpetrators of such an act are hereby warned that this is viewed as a serious offence and will be the subject of disciplinary proceedings.

Innocent users are also warned that they should take steps to protect files which they do not intend to be for public consumption. This is relatively straightforward to achieve with a few simple commands either from a Windows environment or a Unix environment.

3.2.3 Password Security
Do not give out your password to anyone. In particular do not reply to email messages purporting to be from IT staff asking for your password. These are fraudulent "phishing" emails and if you reply your account may be used to defraud other users or send out large volumes of spam. University IT staff will NEVER ask for your password.

3.2.4 Assistance
Information on the use of computing facilities is available at: [http://www.macs.hw.ac.uk/home](http://www.macs.hw.ac.uk/home) - click Support Services, MACS Computing.

The School's 'helpdesk' service is available for requesting assistance and reporting of problems. They can be contacted at help@macs.hw.ac.uk and are located in Room EM 1.33. To quote from the 'Getting Help' page - 'If you require assistance in any aspect of using the computing facilities, or wish to report a problem which has arisen, do this by sending electronic mail to help@macs.hw.ac.uk. Your message goes to a group of support staff, one of whom will respond quickly to you. Please do not take your problems to your favourite computer officer or technician individually.'

3.3 Student Mail
Mail addressed to students will be placed in alphabetically arranged mailboxes in the crush area outside the School Office (EM 1.25). Please check your mailbox regularly. Please also check your internal e-mail regularly and clear out your folders as e-mail is the most common means by which academic staff will contact you.

3.4 Coursework hand-in facility
Coursework boxes are situated outside the School Office (EM 1.25). Each section has its own marked box and unless otherwise indicated by an academic member of staff, work should be posted in the box for the section delivering the course e.g. actuarial student taking a course provided by Mathematics should use the Mathematics box, even though the student is registered to Actuarial Mathematics & Statistics. A front cover must be completed and attached to the
coursework before placing it in the box. Front covers are available above the boxes.

3.5 **Lockers**
Lockers are available for use by students. Lockers are situated in various sites throughout the EM building. Keys are available, for a deposit of £10.00, from Mr. A. Houstin, EM 1.31, between 12 noon and 1 p.m. during the first three weeks of term. If you are unable to pick up the key between these times, please email A.Houstin@hw.ac.uk to arrange a suitable time. Keys remain the property of the university and must be returned at the end of the academic year.

3.6 **General Safety**
3.6.1 **Fire Precautions**
The fire extinguishers provided are mostly of the carbon dioxide hand-operated type and are located in all corridors and are also installed in most laboratories.

The fire alarm system consists of sirens activated by ceiling-mounted smoke detectors situated throughout the building or glass-protected operating buttons.

A practice fire drill, indicated by continuous sounding of the fire alarm, may be held at any time. Students should leave the building by the nearest exit and assemble at the designated fire point at the north end car park as signposted. The lifts will not be working at this time, and will remain on the ground floor with the doors open, so that no-one can be trapped in a lift if the power should fail in an emergency.

On discovering a fire, either lift the nearest red telephone or ring the Control Janitor (extension 2222) on the nearest telephone, and give the location of the fire and your name. If it is safe to do so, tackle the fire with the extinguishers provided. If the fire is serious and likely to endanger others, you should break the glass panel of the nearest operating button, whereby the continuous sounding of the sirens is automatically initiated.

In all university buildings, the continuous operation of the fire alarm siren signifies full evacuation.

Attention is drawn to the Fire Instructions which are printed in blue and displayed throughout the university buildings.

3.6.2 **Security**
Regrettably, from time to time, the university suffers from theft and vandalism. During the day, there are thousands of people on the various sites and it is practically impossible to detect intruders. However, every student is expected to carry an identify card and to produce it if requested.

Thefts of university and personal property occur and students are warned that the university does not accept responsibility for any loss of personal property. Each student is advised to obtain, where possible, a locker, keep personal property in it when not in use and keep it properly locked.

Any theft or suspicious happening should be reported to the School Office (EM 1.24) or to a member of staff.
Apparatus must not be removed from any laboratory/classroom without obtaining permission from the Electronics Technician, Mr. Adrian Hurt (Room EM 1.32). Failure to obtain permission can result in suspicion of theft. It is, therefore, important that this procedure is adhered to at all times, even if apparatus is only taken to a nearby laboratory for a short time.

4 Key Staff and Office Locations

Actuarial Mathematics & Statistics

Head of Department: Prof. Gavin Gibson

**FOR ALL TAUGHT POSTGRADUATE PROGRAMMES**

**Postgraduate Administrator** Jill Gunn, Room EM 1.17, J.P.Gunn@hw.ac.uk

**Special Needs Advisor**

Students with special needs should contact Jill Gunn for information and advice.

A list of all MACS staff can be found at: - [http://www.macs.hw.ac.uk/staff-directory.htm](http://www.macs.hw.ac.uk/staff-directory.htm)
Programme Overview

5.1 Computer Science

Computer Science offers a wide choice of taught postgraduate programmes whose aim is to impart the skills, methodologies and techniques required for the design and realisation of computer systems in a range of settings.

The MSc in Advanced Internet Applications aims of this MSc programme is to teach graduates with an IT background the theory, methods and tools to develop distributed Internet applications using current advanced techniques. These include secure Internet applications, mobile network software and distributed technologies like web services and cloud computing.

The MSc in Artificial Intelligence aims to impart the understanding and skills to develop intelligent software applications such as those involving evolutionary computation and learning.

The MSc in Artificial Intelligence with Speech and Multimodal Interaction aims to give good Computer Science graduates the understanding and skills to develop intelligent software applications, such as those involving evolutionary computation and learning, but with a specialist emphasis on developing spoken and multimodal interfaces.

The MSc in Business Information Management aims to impart skills and understanding in information management and IT with a focus on business. It covers the organisation and development of business, information systems and IT. It also addresses management and design issues for them.

The MSc in Computer Systems Management aims to impart the understanding and skills required to manage complex computer systems as part of the support services of an organisation. This includes selection, installation, maintenance and support of a wide range of computing technologies and an understanding of currently recommended forms.

The MSc in Data Science aims to give good graduates with academic knowledge of databases and programming, the academic expertise they need to apply state of the art data analysis and visualization techniques to modern academic, business and government information processing problems. Particular issues of interest include data visualization, data mining, big data management and high performance information processing.

The MSc in Information Technology (Business) aim is to impart skills and understanding in key IT and business management subjects at Masters level. The programme covers the design and development of IT systems, the management of IT, starting and developing businesses, and ecommerce.

The MSc in Information Technology (Software Systems) aims to impart the understanding and skills to develop advanced software systems to professional standards.

The MSc in Software Engineering aims to impart the understanding and skills to engineer software at an advanced level to professional standards. Students can
specialise in areas like dependable systems, mobile applications, advanced interactive systems like games or using artificial intelligence techniques.

Graduate Diploma in Information Technology is a pre-Masters programme that prepares overseas graduates with IT expertise, but without honours degrees or their 4 year equivalent, for entry to MSc programmes in Computer Science or IT. English can be studied at the same time.

Details of the relevant Programme Directors and Support Staff are provided in Section 4 above.

5.2 Actuarial Mathematics & Statistics
We offer five taught postgraduate programmes.

The MSc in Actuarial Science is a fast track to qualification as an actuary within the examination system of the UK’s professional actuarial bodies. It provides the opportunity for exemption from the Core Technical subjects of the UK professional actuarial bodies’ examinations.

The MSc in Actuarial Management offers further opportunities for exemption from the Specialist Technical subjects of the UK professional actuarial bodies’ examinations.

The MSc in Financial Mathematics, offered jointly with the University of Edinburgh, prepares graduates for a wider range of employment opportunities within the financial services industry. The Programme Co-ordinator for courses provided at Heriot-Watt is Prof Andrew Cairns, but the Academic Programme Director is Dr. Sotirios Sabanis at the University of Edinburgh.

The MSc in Quantitative Financial Risk Management is designed to address the demand in the financial services industry for advanced quantitative financial risk management skills.

The MSc in Quantitative Financial Engineering aims to develop the skills and knowledge required by the modern investment and asset management industry where relative value trading strategies and structuring dominate.

All the above programmes offer a range of taught courses with progression to a 3 month MSc dissertation/project work dependent on satisfactory performance in examinations.

Details of the relevant Programme Directors and Support Staff are provided in Section 4 above.

5.3 Mathematics
We offer six taught MSc programmes, a graduate Certificate/Diploma programme, and a professional development course for Engineers.

The MSc in Applied Mathematical Sciences is aimed at graduates who want to apply modern mathematics in their career. The course blends theory and applications providing core modules and options in applied mathematics, statistics and scientific computing, and optional interdisciplinary modules in
financial mathematics, engineering mathematics, management and computing/IT.

The MSc in Applied Mathematical Sciences with Biological and Ecological Modelling provides opportunities for graduate to develop their applied mathematics skills while acquiring a specialist training in the growing field of modelling in the life sciences.

The MSc in Applied Mathematical Sciences with Climate Change Impact Modelling is a new postgraduate course aimed at people wishing to further develop their applied mathematics skills while also gaining a detailed understanding of the causes, impacts, mitigation and adaptation measures associated with climate change.

The MSc in Computational Mathematics aims to provide students with a clear understanding of the main issues in performing and analysing scientific computations.

The MSc in Mathematics aims to give students an in-depth understanding of a range of topics in mathematics.

The MSc in Quantitative Finance and Mathematics focuses on practical computational and applied mathematics aspects of finance and uncertainty, and students graduating from the programme will have excellent employment prospects that are not restricted to any one narrow sector of financial services.

The Graduate Certificate/Diploma in Mathematical Sciences aims to improve a candidate's level of mathematical expertise to the point where they can gain entry to one of the Mathematical MSc courses run by the School (currently the MSc Applied Mathematical Sciences, MSc Applied Mathematical Sciences with Biological & Ecological Modelling, MSc/Diploma in Actuarial Sciences or MSc Financial Mathematics), or to apply for jobs requiring Mathematical and/or Statistical skills at honours level.

The Advanced Mathematics and Statistics for Engineers MTP programme aims to provide mathematics, engineering and science graduates with transferable, modern mathematical and statistical skills.

Details of the relevant Programme Directors and Support Staff are provided in Section 4 above.

*Heriot-Watt University reserves the right to update materials from time to time and will ensure that advance notification concerning changes to materials is provided to students on the relevant section of the University website. It is the responsibility of students to check the website, particularly if they are returning to studies after a period during which their studies have been in abeyance.*

6 **Programme Structure and Delivery**

A Student Guide to your intended programme will be distributed to all students at the pre-registration meeting for your programme. The Guide provides full information on the academic content of the course, its structure, delivery, progression/award/ reassessment criteria and administrative arrangements.
The University operates a Common Assessment and Progression System (CAPS) which specifies minimum progression requirements. Schools have the option to apply progression requirements above the minimum University requirement, which are approved by the Studies Committees. Students should refer to the programme specific information on progression requirements. This information is detailed in the individual Programme Handbooks.
PART B – UNIVERSITY INFORMATION

The Academic Registry is responsible for producing Part B of the handbook to provide information and assistance on University policies and support services.

Students should contact the appropriate School/Institute in the first instance for any academic query or assistance.

Please note that the following sections are standard sources of information provided to all students. However, certain aspects are programme-specific and students should refer to the relevant Programme Student Handbook.

B1. UNIVERSITY POLICY AND GUIDANCE

The University publishes many policies and reference information on its website that may be of use and of interest to students through the programme of their studies at Heriot-Watt University

Wherever practicable, University policy is designed to include all members of the University’s community, both within and out with the main campus environments.

Important information for students is contained in the Student Learning Code of Practice. This document is attached in Appendix A.

Policies of specific interest and relevance to students can be accessed via:

http://www1.hw.ac.uk/committees/ltb/ltb-policies.htm

B2. ORDINANCES AND REGULATIONS

Heriot-Watt University has a detailed set of rules which governs the operation and management of University business. These are referred to as Ordinances and these Ordinances are set by the Court, which is the governing body of the University. The Ordinances provide a regulatory framework for corporate governance,

The University Ordinances are supported by University Regulations which provide a regulatory framework for the governance of academic-related matters which Staff and Students must adhere to for all academic matters.

There are a number of policies and procedures that underpin the Ordinances and Regulations.

The following section on Academic Support Services often refers to Ordinances and Regulations. These links will provide you with information and guidance on all matters relating to your academic life.

A full list of Ordinances and Regulations are available at the following weblink:

http://www.hw.ac.uk/ordinances/

B4. QUICK FINDER GUIDE TO STUDENT ADMINISTRATION AND SUPPORT SERVICES

Much of the detail this handbook provides guidance and links for the academic operations of a complex institution like Heriot-Watt University. However, as well as helping to inform students, the University also hopes to ensure that students are happy members of a vibrant community.

This section outlines the range of services available for students to help them get the most out of their time here and to assist with any problems they may experience along the way.

APPENDIX A

STUDENT LEARNING CODE OF PRACTICE for those studying on campus

What staff can expect from students

Most importantly, we expect you to take charge of your own learning. This is your degree; to get the most of your time at the University you need to be independent, self-motivated and proactive in your studies. We understand that you may have other demands on your time, but your studies should come first. In addition, we expect:

• Preparation for classes as specified by your lecturers, including studying lecture notes, working on tutorial questions and participating in online activities. To do well in your studies you will need to undertake a significant amount of private study in addition to attending your timetabled classes
• Full engagement and attendance on time for lectures, laboratories, seminars and tutorials: during the semester it is your responsibility to be available to attend classes and, in particular, class tests
• Basic organisational skills, including coming to classes with pen and paper ready to take notes or with equipment for electronic note-taking, and using a calendar so that you don't forget deadlines and appointments
• Attention, courtesy and participation during classes; this includes asking and answering questions in lectures and tutorials
• Respecting deadlines for any assignments
• Taking responsibility for your work, whether completed individually or as part of a group
• Attendance at any scheduled meetings with a member of staff. If you can’t make a scheduled meeting, please notify the member of staff in advance rather than just not attending
• Checking your University email, providing timely responses to emails from members of staff
• Provision of feedback on your courses and programme
• Commitment to your learning and a professional approach to your academic work
• Self-reflection on progress and willingness to learn from feedback on tutorial work, projects, exams, and trying to improve your work based on that feedback
• Determination and persistence; some topics and problems will be challenging and we expect you to make a sustained effort to master difficult topics. Lecturers are there to help if you need it
• To keep yourself informed about new and interesting developments in your discipline (beyond what is covered in your courses)
• Full referencing of all work *
• Adherence with regulations and requirements, including health and safety
• Politeness and respect for all members of the Heriot-Watt University community (www.hw.ac.uk/equality/Values/Values%20Index.htm) and for the facilities/services provided. This includes switching off your phones and other social media during classes

* Full referencing is required in accordance with the conventions of your subject area/discipline. Guidance on referencing and the use of sources is available from your subject librarian and the Effective Learning Service (http://www.hw.ac.uk/is/skills-development/study-support.htm). Remember that plagiarism is an academic offence even if it is unintentional; you need to take care to avoid it.
What students can expect from staff

Teaching is one of the most important duties for members of staff. Although members of academic staff have research and administrative duties which also require attention, we aim to provide:

- Commitment to helping you learn, with support, encouragement and technical back-up to help you develop your skills
- Research informed teaching and high quality delivery of learning materials in accordance with the syllabus
- Advice and support on course content at tutorials, laboratories and through pre-arranged meetings
- Appropriate supervision of project/dissertation work
- Clear information and guidance on assessment requirements
- Availability for face-to-face meetings, either during scheduled office hours or at pre-arranged times
- Timely oral and written feedback
- Timely provision of marks/grades for coursework and exams
- A prompt response from your mentor
- A timely response to general email questions
- Guidance on specific regulations and requirements including those related to health and safety
- Politeness and respect (www.hw.ac.uk/equality/Values/Values%20Index.htm)

Sometimes members of staff are away on University business and are not able to respond as quickly as normal. If this happens, they will leave an "out-of-office" message and will advise you who to contact instead.

If you have a problem

If you have a personal or any other type of problem that is having an adverse effect on your studies, please discuss it with your mentor. We are here to help. You can also discuss any personal problems including counselling, disability and financial difficulties with the staff in the Student Support (and Accommodation) Office (www.hw.ac.uk/support, or email studentsupport@hw.ac.uk).

For problems about your course or study programme, talk to the lecturer first. If that doesn't help, you can raise the matter with your Class Representative or the Year Director of Studies.

Academic Registrar and Deputy Secretary
September 2013; rev January 2014
APPENDIX B

STUDENT GUIDE TO PLAGIARISM

Plagiarism is intellectual theft and is a major offence which the University takes seriously in all cases. Students must therefore avoid committing acts of plagiarism by following these guidelines and speaking to academic staff if they are uncertain about what plagiarism means. Those who are found to have plagiarised will be subject to the University’s disciplinary procedures, which may result in penalties ranging from the deduction of credits and modules already achieved by students to compulsory termination of studies. Students are advised to refer to Regulation 50 at http://www.hw.ac.uk/ordinances/regulations.pdf and to the Guidelines for Staff and Students on Discipline at http://www1.hw.ac.uk/registry/discipline.htm for further details of how the University deals with all acts of plagiarism.

Introduction

1.1. This guide is intended to provide students at Heriot-Watt University with a clear definition of plagiarism and examples of how to avoid it.

1.2. The guide may also be of use to members of staff who seek to advise students on the various issues outlined below.

Definition

1.3. Plagiarism involves the act of taking the ideas, writings or inventions of another person and using these as if they were one’s own, whether intentionally or not. Plagiarism occurs where there is no acknowledgement that the writings or ideas belong to or have come from another source.

1.4. Most academic writing involves building on the work of others and this is acceptable as long as their contribution is identified and fully acknowledged. It is not wrong in itself to use the ideas, writings or inventions of others, provided that whoever does so is honest about acknowledging the source of that information. Many aspects of plagiarism can be simply avoided through proper referencing. However, plagiarism extends beyond minor errors in referencing the work of others and also includes the reproduction of an entire paper or passage of work or of the ideas and views contained in such pieces of work.

Good Practice

1.5. Academic work is almost always drawn from other published information supplemented by the writer’s own ideas, results or findings. Thus drawing from other work is entirely acceptable, but it is unacceptable not to acknowledge such work. Conventions or methods for making acknowledgements can vary slightly from subject to subject, and students should seek the advice of staff in their own School/Institute about ways of doing this. Generally, referencing systems fall into the Harvard (where the text citation is by author and date) and numeric (where the text citation is by using a number). Both systems refer readers to a list at the end of the piece of work where sufficient information is provided to enable the reader to locate the source for themselves.

1.6. When a student undertakes a piece of work that involves drawing on the writings or ideas of others, they must ensure that they acknowledge each contribution in the following manner:

The author acknowledges the following sources of information used in preparing this guide to Plagiarism:
“Plagiarism – A Good Practice Guide”, Carroll, J and Appleton, J (2001) and various extracts from Student/Course Handbooks 2004/2005, Schools and Institutes at Heriot-Watt University
• **Citations**: when a direct quotation, a figure, a general idea or other piece of information is taken from another source, the work and its source must be acknowledged and identified where it occurs in the text;

• **Quotations**: inverted commas must always be used to identify direct quotations, and the source of the quotation must be cited;

• **References**: the full details of all references and other sources must be listed in a section at the end of any piece of work, such as an essay, together with the full publication details. This is normally referred to as a “List of References” and it must include details of any and all sources of information that the student has referred to in producing their work. (This is slightly different to a Bibliography, which may also contain references and sources which, although not directly referred to in your work, you consulted in producing your work).

1.7. Students may wish to refer to the following examples which illustrate the basic principles of plagiarism and how students might avoid it in their work by using some very simple techniques:

1.7.1. Example 1: A Clear Case of Plagiarism

Examine the following example in which a student has simply inserted a passage of text *(in italics)* into their work directly from a book they have read:

University and college managers should consider implementing strategic frameworks if they wish to embrace good management standards. *One of the key problems in setting a strategic framework for a college or university is that the individual institution has both positive and negative constraints placed upon its freedom of action.* Managers are employed to resolve these issues effectively.

This is an example of bad practice as the student makes no attempt to distinguish the passage they have inserted from their own work. Thus, this constitutes a clear case of plagiarism. Simply changing a few key words in such a passage of text (e.g. replace ‘problems’ with ‘difficulties’) does not make it the student’s work and it is still considered to be an act of plagiarism.

1.7.2. Common Mistakes

Students may also find the following examples of common plagiarism mistakes made by other students useful when reflecting on their own work:

• “I thought it would be okay as long as I included the source in my bibliography” [without indicating a quotation had been used in the text]
• “I made lots of notes for my essay and couldn’t remember where I found the information”
• “I thought it would be okay to use material that I had purchased online”
• “I thought it would be okay to copy the text if I changed some of the words into my own”
• “I thought that plagiarism only applied to essays, I didn’t know that it also applies to oral presentations/group projects etc”
• “I thought it would be okay just to use my tutor’s notes”
• “I didn’t think that you needed to reference material found on the web”
• “I left it too late and just didn’t have time to reference my sources”

None of the above are acceptable reasons for failing to acknowledge the use of others’ work and thereby constitute plagiarism.

1.8. What follows are examples of the measures that students should employ in order to correctly cite the words, thought or ideas of others that have influenced their work:

1.8.1. Example 2: Quoting the work of others

---

2 Extract from ‘Plagiarism at the University of Essex’ advice copyrighted and published by the Learning, Teaching and Quality Unit at the University of Essex ([http://www.essex.ac.uk/plagiarism/reasons.html](http://www.essex.ac.uk/plagiarism/reasons.html)), reproduced with kind permission.
If a student wishes to cite a passage of text in order to support their own work, the correct way of doing so is to use quotation marks (e.g. “ ”) to show that the passage is someone else’s work, as follows:

“One of the key problems in setting a strategic framework for a college or university is that the individual institution has both positive and negative constraints placed upon its freedom of action”.

1.8.2. Example 3: Referencing the work of others

In addition to using quotation marks as above, students must also use a text citation. If the work being cited is a book, page numbers would also normally be required. Thus, using the Harvard system for a book:

“One of the key problems in setting a strategic framework for a college or university is that the individual institution has both positive and negative constraints placed upon its freedom of action” (Jones, 2001, p121).

The same reference could also be made to a book using the numeric system:

“One of the key problems in setting a strategic framework for a college or university is that the individual institution has both positive and negative constraints placed upon its freedom of action” (Ref.1, p121).

More often, a piece of work will have multiple references and this serves to show an examiner that the student is drawing from a number of sources. For example, articles by Brown and by Smith may be cited as follows in the Harvard system

“It has been asserted that Higher Education in the United Kingdom continued to be poorly funded during the 1980’s [Brown, 1991], whereas more modern writers [Smith, 2002] argue that the HE sector actually received, in real terms, more funding during this period than the thirty year period immediately preceding it”.

or as follows using the numeric system:

“It has been asserted that Higher Education in the United Kingdom continued to be poorly funded during the 1980’s [Ref 1], whereas more modern writers [Ref 2] argue that the HE sector actually received, in real terms, more funding during this period than the thirty year period immediately preceding it”.

1.8.3. Example 4: Use of reference lists

Whichever system is used, a list must be included at the end, which allows the reader to locate the works cited for themselves. The Internet is also an increasingly popular source of information for students and details must again be provided. You should adhere to the following guidelines in all cases where you reference the work of others:

If the source is a book, the required information is as follows:

- Author’s name(s)
- Year of Publication
- Title of Book
- Place of Publication
- Publishers Name
- All Page Numbers cited
- Edition (if more than one, e.g. 3rd edition, 2001)

If the source is an article in a journal or periodical, the required information is as follows:

- Author’s name(s)
- Year of Publication
- Title of Journal
- Volume and part number
- Page numbers for the article

If the source is from the Internet, the required information is as follows:
The way in which the information is organised can vary, and there are some types of work (for example edited volumes and conference proceedings) where the required information is slightly different. Essentially, though, it is your responsibility to make it clear where you are citing references within your work and what the source is within your reference list. **Failure to do so is an act of plagiarism.**

1.9. Students are encouraged to use a style of acknowledgement that is appropriate to their own academic discipline and should seek advice from their mentor, course leader or other appropriate member of academic staff. There are also many reference sources available in the University Library which will provide useful guidance on referencing styles.

### Managing Plagiarism

1.10. Students, supervisors and institutions have a joint role in ensuring that plagiarism is avoided in all areas of academic activity. Each role is outlined below as follows:

**How you can ensure that you avoid plagiarism in your work:**

- Take responsibility for applying the above principles of best practice and integrity within all of your work
- Be aware that your written work will be checked for plagiarism and that all incidents of plagiarism, if found, are likely to result in severe disciplinary action by the University. The standard penalty is to annul all assessments taken in the same diet of examinations (for details please refer to Regulation 50 at [http://www.hw.ac.uk/ordinances/regulations.pdf](http://www.hw.ac.uk/ordinances/regulations.pdf) and to the Guidelines for Staff and Students on Discipline at [http://www1.hw.ac.uk/registry/discipline.htm](http://www1.hw.ac.uk/registry/discipline.htm)).

**How your School/Institute will help you to avoid plagiarism:**

- Highlight written guidance on how you can avoid plagiarism and provide you with supplementary, verbal guidance wherever appropriate
- Regularly check student work to ensure that plagiarism has not taken place. This may involve both manual and electronic methods of checking. A number of plagiarism detection packages are in use at Heriot-Watt University, one example being the Joint Information Systems Committee (JISC) “Turnitin” plagiarism detection software.
- Alert you to the procedures that will apply should you be found to have committed or be suspected of having committed an act of plagiarism and explain how further action will be taken in accordance with University policy and procedures.

**How the University will endeavour to reduce student plagiarism:**

- Provide clear written guidance on what constitutes plagiarism and how to avoid it directly to your School/Institute and to you
- Alert you and staff in your School/Institute to the penalties employed when dealing with plagiarism cases
- Take steps to ensure that a consistent approach is applied when dealing with cases of suspected plagiarism across the institution
- Take the issue of academic dishonesty very seriously and routinely investigate cases where students have plagiarised and apply appropriate penalties in all proven cases.
