

## Design id 7

colourful

Great

confused, not pleasing to the eye

I felt visually stimulated by the colour palette, pattern and shapes.

erratic

Design felt quite digital, didn't really emit very specific feelings of emotion.

dull, smoky, lights

deep, agitated, sombre

Curious, contemporary, confused, artistic

This picture is very geometric but it makes me feel high haha... Not only can I see millions of squares, I can start to see curves when I look at it for longer. It is an enticing image and makes me feel confused and happy!

It gives a feeling of deep, 3D space. Reminds a building at night time with lights in every window.

I felt lost, a little sad with the colours fading away. Rather unsure which direction I'm heading towards

abstract, interesting, eye-catching

The dull colours were boring compared to the last but design is interesting
