F28HS2 Hardware Software Interface
Laboratory 1

A) write a C program which counts the number of characters in a file, from a command line argument.

```
$ count path
```
-   displays number of characters from `path`

B) modify `copy.c` to append an arbitrary number of files into a single file, from command line arguments:

```
$ append source₁ ... sourceₙ destination
```
-   copies $source_1$ ... $source_N$ into `destination`
