How to publish your Web browser

1. On Microsoft Visual Studio 2012, open your project and on the **Solution Explorer** on the top right, right click on your project's name

2. From the drop down menu select Publish... This will open the Publish Wizard

- 3. Choose a location to store the published application and press Next
- 4. Choose From a CD-ROM or DVD-ROM and press Next
- 5. Choose The application will not check for updates and press Next and Finish
- 6. In your projects folder you will find a **publish** folder with the **setup** and **[application name]** files and an **Application Files** folder

7. Run the setup.exe

8. When the Security Warning comes up select Install.

Application Install - Security Warning
