PART A – CAMPUS AND PROGRAMME INFORMATION

1 SUMMARY OF KEY INFORMATION

1.1 KEY CONTACTS

Professor Ammar Kaka is the Head of the Heriot-Watt University Dubai Campus (HWUDC). There are 8 Academic Schools functioning within the Heriot Watt University Dubai Campus and each of them is managed by the Associate Head of School based in Dubai. Each Academic programme is led by a Programme Coordinator, supported by an experienced academic staff team located at the University’s campus at Dubai International Academic City. The address and contact details are noted overleaf. In the first instance, students should contact us via our Reception staff who will be pleased to help direct queries to the appropriate person.

<td>Autumn Diet - Examinations (Resit)</td>
<td>Thursday 2nd August 2018</td>
<td>Friday 10th August 2018</td>
</tr>
<tr>
<td>Graduation</td>
<td>November 2018</td>
<td></td>
</tr>
</tbody>
</table>

The Teaching Timetable for each Semester would be published on the link http://www.hw.ac.uk/students/studies/timetables/dubai.htm before the start of each Semester.

All examinations take place during the assessment blocks. Resit examinations are scheduled during the summer vacation. Full details of examination timetabling are published at the campus and can be found at: http://www.hw.ac.uk/students/studies/examinations/timetables.htm
OFFICIAL UAE LOCAL HOLIDAYS & HERIOT-WATT UNIVERSITY DUBAI CAMPUS CLOSED DAYS

The official National holidays in the United Arab Emirates (UAE) are listed below. The Heriot-Watt University Dubai Campus will be closed on the approximate dates mentioned below:

<table>
<thead>
<tr>
<th>Local Holiday</th>
<th>Proposed HWU Dubai Campus closed days *</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arafat Day and Eid-al-Adha (Feast of Sacrifice)</td>

2 WELCOME AND INTRODUCTION

2.1 Welcome from the Principal
I am very pleased to welcome you to Heriot-Watt University!

I am delighted you have chosen to study at our innovative and distinctive University. You are now part of an unparalleled global community that connects students, staff and alumni.

As one of the most progressive and international Institutions based in Scotland, here you will have the opportunity to thrive, both personally and academically, during your time with us. As a student I invite you to contribute to our future together as we continue to develop the learning and teaching experience we deliver across the world – transforming people, society and the world we live in.

Our learning environment seeks to offer the very best in terms of study programmes which apply knowledge to real world challenges, together with the latest learning technologies, and outstanding support and facilities.

As students the University wants to encourage you to see the world, then change it. We have developed opportunities for student mobility through our Go Global inter campus exchange, encouraging all our students to benefit from working and socialising in an international institution, whether at a single campus location or abroad.

Our graduates are sought by global professions and industries. The very nature of a Heriot-Watt research-informed education, underpinned by our values, ensures you will have the opportunity to develop the leadership skills and confidence, to be global citizens of the world who are specialists in their chosen field and experts in their professions.

I hope you thoroughly enjoy the experience of being a Heriot-Watt student and on behalf of all of the staff, we look forward to you commencing your studies with us.

Professor Richard A Williams OBE
Principal and Vice-Chancellor

2.2 Welcome from the Head of Dubai Campus
It is with great pleasure that we welcome you to the University’s Dubai Campus

Heriot-Watt University is proud to be here in the UAE, providing a range of high quality programmes, relevant to the Middle East region, to the UAE and to the aspirations of its people. Heriot-Watt has a long tradition of providing vocationally relevant academic programmes, with strong industry and research links. There are currently over 500 Heriot-Watt Alumni living and working in the UAE and the Gulf States as well as our current students, so you will be joining a successful and vibrant community!

We welcome you to your chosen degree programme either as a postgraduate or undergraduate student and look forward to working with you to help you achieve your personal ambitions and goals.

Professor Ammar Kaka
A Vice Principal of Heriot-Watt University and
Head of Heriot-Watt University Dubai Campus

2.3 Welcome from Head of School
I am delighted to echo my colleagues’ welcome to our University and to our Dubai campus. It is also my pleasure to welcome you to the School of Mathematical and Computer Sciences. You are joining a thriving School with a strong tradition of research, scholarship and teaching in Computer Science and Information Technology. You are about to start on a well-established
undergraduate programme leading to a highly regarded and internationally recognised qualification. As our student, you will enjoy the professionalism, enthusiasm and friendliness of our Dubai-based staff, confident that you are receiving the same high standards of teaching and assessment as your fellow students in Scotland.

I trust that you will find studying with us both stimulating and rewarding.

Professor Beatrice Pelloni  
Head of the School of Mathematical & Computer Sciences

3 GENERAL INFORMATION ABOUT HERIOT-WATT UNIVERSITY AND THE DUBAI CAMPUS

Heriot-Watt University is an international university, based in Edinburgh, the capital of Scotland in the UK, with campuses in the north and south of Scotland, Dubai and Malaysia. The University also has a worldwide network of Learning Partners.

Wherever they are located, Heriot-Watt students have the opportunity to study programmes which will equip them to contribute immediately to the economy and wellbeing of the region in which they choose to work. This ethos of “doing things that matter” stretches right back to the origins of Heriot-Watt in 1821, when programmes were run to suit the needs of developing industries in Scotland.

The Heriot-Watt University Dubai Campus is located in the Dubai International Academic City. The University is the first to operate from this rapidly-developing site, and is offering programmes that meet the demands of the region and beyond.

The Dubai Campus is certified and permitted by Knowledge and Human Development Authority (KHDA) which is part of the Dubai Government (UAE). Heriot-Watt is running all its Programmes and activities of higher education in UAE under the rules and regulations of KHDA.

5 PROGRAMME OVERVIEW

Heriot-Watt University reserves the right to update materials from time to time and will ensure that advance notification concerning changes to materials is provided to students on the relevant section of the University website. It is the responsibility of students to check the website, particularly if they are returning to studies after a period during which their studies have been suspended.

6 PROGRAMME STRUCTURE AND DELIVERY

The University operates a Heriot-Watt Assessment and Progression System (HAPS) which specifies minimum progression requirements. Schools have the option to apply progression requirements above the minimum University requirement, which are approved by the Studies Committees. Students should refer to the programme specific information on progression requirements. This information is detailed later in this handbook.

Introduction

This handbook contains information on the programme structure, notes, description and the courses offered on the Computer Science degree.

School Student Website

Lots of information regarding MACS programmes and courses can be found at: [http://www.macs.hw.ac.uk/students/](http://www.macs.hw.ac.uk/students/)

University Student Website

[https://www.hw.ac.uk/students/index.htm](https://www.hw.ac.uk/students/index.htm)

Student Portal

You can access the University Student Portal at: [http://portal.hw.ac.uk/](http://portal.hw.ac.uk/)

Virtual Learning Environment (VLE)

Most courses have on-line material available at the University’s Virtual Learning Environment (VISION) which can be found at: [http://vision.hw.ac.uk/](http://vision.hw.ac.uk/)
Student Self Service
This is where you can update your address and where you will get your on-line results - www.hw.ac.uk/selfservice.

Graduate Attributes
As a student of Heriot-Watt University, you are part of our global community. You will meet new people, discover new interests, develop your life skills and enhance your employability and career prospects.

The University will provide you with opportunities to develop skills, qualities and academic abilities during your time as a Heriot-Watt student. These are known as the Four Heriot-Watt Graduate Attributes:

- Specialist
- Creative
- Global
- Professional

Further information can be found at: https://www.hw.ac.uk/students/doc/StudentGraduateAttributes.pdf

Degree Structure
Our academic year is divided into 2 semesters corresponding to 30 weeks. There will be 12 weeks teaching in each semester. You are expected to study 4 courses each semester, giving a total of 8 courses in a full year. Each course is worth 15 credits. Courses may be mandatory or optional.

Mandatory courses: These courses are compulsory.

Optional courses: Students are required to choose from a specified list of courses relevant to the subject area of their degree discipline.

All undergraduate courses are designed to be of equal length in terms of student effort. The average student is expected to put in a total effort of 150 hours per course. These 150 hours includes all lectures, tutorials, computing labs, workshops, background reading, writing up notes, coursework, revision and examinations for the course.

The Course Descriptor
The course information, which appears in the format below, is designed to provide you with sufficient details about courses, their content and assessment methods and will help you choose your optional courses.

</tbody>
</table>
Terminology

Course Code
The first character identifies the School (F = MACS)
The second digit identifies the discipline area (2 = Computer Science).
The next digit is the SCQF level of the course:
SCQF Level 7 normally studied in Year 1
SCQF Level 8 normally studied in Year 2
SCQF Level 9 normally studied in Year 3
SCQF Level 10 normally studied in Year 4 (a zero in course codes)
SCQF Level 11 normally studied in Year 5/Postgraduate (a one in course codes)
The next 2 letters identify the topic.

Course Co-ordinator:
The name of the member of staff who is responsible for delivery of the course.

Pre-requisites:
Students must have gained Grade D or above in the courses listed here in order to gain entry to the course.

Aims:
A brief statement of what the course aims to do.

Syllabus:
A brief summary of what is included in the course.

Learning Outcomes:
These will include Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning).

Learning Outcomes:
Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT.

Assessment Methods:
Details of the weighting and type of assessment(s) and re-assessment (if any) for the course.

Staff/Student Expectations
What you can expect from staff
Teaching is one of the most important duties for staff. Although we have research and admin duties which need our attention too, we promise students:
♦ Commitment to helping you learn
♦ Politeness and respect
♦ A regular office hour slot for face to face meetings
♦ Written feedback and a mark for coursework within 15 working days after the hand-in time.
♦ A reply to general email questions within 5 working days
♦ A response from your personal tutor within 2 working days
♦ If you would like to see your exam script to see where you went wrong, send a signed letter to the Academic Head to request this. (It may take a bit of time to get the paper scanned if it has been sent to Edinburgh). You can also make an appointment with the lecturer to get further advice on how to improve your work.
♦ Sometimes staff members are away on university business (for example at a research project meeting outside the UK), and won’t be able to respond as quickly as normal. If this happens, they will tell you about it (e.g. on an “out of office” message) and will advise you who to contact instead.
What staff can expect from students

Most importantly, we expect you to take charge of your own learning. This is your degree! To get the most of your time at university you need to be independent and proactive. We understand that you have other demands on your time, such as paid employment, but as full time students, your studies should come first.

♦ Commitment to your learning
♦ Politeness and respect
♦ Attendance at classes, unless they are specifically identified as voluntary. During semester it is your responsibility to be available on campus to attend classes and in particular class tests.
♦ Attention, courtesy and participation during classes
♦ Preparation and practice for classes as specified by the lecturers, such as reading or coding. For every hour of timetabled class, we expect you to spend 2-3 hours in private study.
♦ Practice, practice practice! In order to become a good programmer, you need to program regularly. If you are having trouble we will help, but the most useful thing you can do for yourself is devote time to programming.
♦ Basic organisation skills, such as coming to classes with pen and paper ready to take notes, and using a calendar so you don’t forget deadlines and appointments
♦ If you can’t make a scheduled meeting with a staff member, please notify them in advance rather than just not turning up
♦ Check your email and logging into Vision at least every other day
♦ A reply to email from staff within 5 working days (if it requires a reply!)
♦ We expect you to pay attention to the feedback we give you, and to attempt to improve your work based on that feedback.
♦ We encourage you to keep yourself informed about new and interesting developments in computer science above and beyond what you learn in the taught courses. The department is full of experts in a wide range of areas who would love to chat to keen students about their research. Seek them out!
♦ If you have a problem which is interfering with your studying, please discuss it with your personal tutor. We are here to help.

Personal Tutor

You will be allocated a personal tutor when you arrive at the University and this is normally the year supervisor. Your personal tutor is your main academic link with the University, and will help you choose courses and register for courses at the beginning of the session. Under certain circumstances, with the permission of the Academic Head in Dubai, it may be possible to change your personal tutor.

Every year a few students run into personal difficulties (e.g. family illness, accommodation, financial, etc.). As well as being generally supportive, personal tutors can help in a number of practical ways. For example, if illness prevents you from completing project work or sitting examinations, your personal tutor can sometimes help with re-scheduling or making alternative arrangements for assessment. However, you must notify your personal tutor as soon as possible, or there is very little that can be done. This is particularly important if illness affects your Examinations. Also, it is essential to provide a medical certificate (see Mitigating Circumstances, p 14). With other problems, your personal tutor can put you in touch with the appropriate University support service. Personal tutors are there to help; do not hesitate to contact yours if you need them.
Meetings with your Personal Tutor
Your personal tutors will offer a face to face meeting on at least three points during the academic year.

Key contact points for new students (first year and direct entrants)
*Welcome Week*: during your induction programme you will find out about the personal tutoring system and have the opportunity to ask any questions.

*By the end of teaching week 2*: you will be invited to a meeting to discuss settling in and check that things are going well.

*Week 8 or 9*: you will meet with your personal tutor to discuss end of semester assessments. It is an opportunity for you to discuss any anxieties you have over assessments, seek guidance on revision, and reflect on your learning and the academic skills they need to develop to be successful in your assessments.

*Post-assessment*: early in semester 2, you will be invited to a meeting to discuss your semester 1 results. This is an opportunity for you to discuss what has gone well, or not so well, and how the 1st semester experience will help in semester 2 and beyond.

In addition, you may be invited to other meetings throughout the year and should attend. You may request meetings at other times if you need to talk to your personal tutor, you don’t have to wait until the next scheduled meeting.

Key contact points for continuing students
*By the end of teaching week 5*: you will be invited to discuss how you are settling in to the new academic year, if any optional courses you have chosen are going well and if there are any points of discussion arising from the previous semester’s assessments.

*Semester 2 post assessments*: early in semester 2 you will be invited to a meeting to discuss your semester 1 results. This is an opportunity for you to reflect on what has gone well, or not so well, and how your 1st semester experience will help you in semester 2 and beyond.

In addition, you may be invited to other meetings throughout the year and should attend. You may request meetings at other times if you need to talk to your personal tutor, you don’t have to wait until the next scheduled meeting.

Dubai Contacts:
- **Academic Head**  
  Mr Steve Gill  
  S.Gill@hw.ac.uk
- **Undergraduate Director of Studies**  
  Mr Talal Shaikh  
  T.A.G.Shaikh@hw.ac.uk

Further information on the role of personal tutors can be found at: [https://www.hw.ac.uk/students/studies/personal-tutors.htm](https://www.hw.ac.uk/students/studies/personal-tutors.htm)

Go Global
At Heriot-Watt, you have the opportunity to become a global student by taking part in an Inter-Campus Transfer, Erasmus+ or Exchange. Studying abroad is a unique opportunity and likely to provide some of your most memorable life experiences. Further information can be found at: [https://www.hw.ac.uk/students/studies/go-global.htm](https://www.hw.ac.uk/students/studies/go-global.htm)

Staff-Student Liaison Meetings
Students are asked to elect a class representative at the start of every academic year. Your representative will keep the staff up to date with any problems which students in the year have identified, and they also keep students informed of actions taken by staff to address these problems. Also, every semester, staff and students meet regularly to discuss how the courses are
going. We are keen to get feedback from students on how we could improve our teaching and facilities. The class representatives for each year will be present, as well as the year supervisor and the Director of Undergraduate Studies. All students from the relevant year groups are also very welcome to attend. Look out for emails with the dates and topics for these meetings.

If you have a complaint about a course, the first thing to do is to talk to the lecturer in question, or ask the class representative to do this for you. If that doesn’t work, you can bring it to the consultation meetings.

**Enrolment for Courses**
You must be enrolled for the courses which you are studying. This will be done initially during on-line enrolment.

Any subsequent changes to optional choices must be agreed between you and your Director of Studies or personal tutor, and then recorded on a Change of Course Form available from Academic Administration Office. The form must then be returned to AAO for processing.

All course changes must be made by the end of week 3 of each semester. **No changes** can take place after week 5 of each semester.

**Feedback**
Feedback is a two-way process. Feedback is provided to students in a variety of ways in order to help you to reflect on and to evaluate your progress and to assist you to take steps to improve before the next relevant assessment. For most courses, students can expect feedback on assessed coursework within three teaching weeks of the coursework due date.

Feedback is sought from students via Student-Staff Liaison Committees and various surveys so that the School can continue to enhance the student learning experience. Your feedback is valued by the School, so please be sure to provide feedback whenever it is sought.

**Attendance Requirements**
In order to achieve course and programme learning outcomes, students are expected to attend all scheduled course learning sessions (e.g. timetabled lectures, tutorials, lab sessions, etc). Should you have to miss a timetabled session due to ill health or other legitimate reasons, you should submit a self-certification or medical certification or an application for consideration of Mitigating Circumstances – details can be found at: [https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm](https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm)

Students who fail to satisfy course attendance requirements may, after due warning, be disallowed from presenting themselves for examination in the course.

Coursework must be handed in by the stipulated dates, and students are required to see their personal tutors at agreed times. Students who fail to submit compulsory coursework may also be disallowed from presenting themselves for examination in the relevant courses.

All lectures, tutorials and laboratories are compulsory and registers of attendance may be taken.

If you are absent from class due to illness for four days or less, you should complete a self-certification form, obtainable from the Student Services and return it to the Student Services within a week of your return. If you are absent for more than four days, you must supply a medical certificate to the Student Services within a week of your return.

**Plagiarism & Cheating**
Cheating in examination and plagiarism, which is, the presentation of another person’s ideas or work as one’s own, are very serious offences and are dealt with severely. They carry a range of penalties up to and including expulsion from the University.
Students are responsible for familiarizing themselves with University policy on these matters. For more detail, see the Student Guide to Plagiarism at: https://www.hw.ac.uk/students/doc/plagiarismguide.pdf

**Submission of Coursework**
Students are required to complete all coursework at a satisfactory level. Coursework must be submitted by the deadline given. The default policy of the School is that coursework submitted late should have its given mark reduced by 10% for each working day it is late. Lecturers will supply details of how coursework will be submitted for their course.

Students who have serious concerns about meeting submission dates for coursework should consult the Course Leader as soon as possible. Any extension to the submission deadline must be approved by the Course Leader, and the reason for the extension will be recorded. Applications for extensions made after the due submission date will not normally be approved.

**Examinations**
It is the student’s responsibility to check all relevant examination information at: https://www.hw.ac.uk/students/studies/examinations.htm.

You must not book holidays or take on any other commitments during the assessment diet.

Should you be required to resit any exams, you must be available to take them during the re-assessment diet in August.

All examinations must be taken at the Dubai Campus.

**Calculators, Dictionaries & Electronic Devices**
Where a calculator is required for the completion of an examination, a student may use any basic scientific calculator, except the following: graphics calculator, programmable calculator and a calculator which features text storage or retrieval facilities. You must bring your own calculator to the examination as the University do not provide them.

No translation dictionaries are permitted in any of the University’s examinations. The only exception to the policy is in the case of individual students who had been assessed by the University’s Disability Service as requiring access to a translation dictionary.

Students are not allowed to have mobile phones or other communication devices on or about their person during examinations. Phones may be left at the front of the examination room but must be switched off.

**Unauthorised Material**
You must not have any unauthorised pre-printed materials or electronic devices or in the examination room. Cheating in an examination is treated very seriously by the University. If you do have any material relevant to the exam which you have brought in by mistake, you must hand it over to an invigilator before the start of the examination. Invigilators will carry out checks on authorised materials and calculators.

Information on examinations, including timetables, re-assessment procedures etc can be found at: https://www.hw.ac.uk/students/studies/examinations.htm.

Past exam papers for can be found at: http://www.macs.hw.ac.uk/students/cs/

**Past exam papers** are only accessible on-campus or if you use the VPN (http://vpn1.hw.ac.uk)
Grades & Assessments
Grades for each course are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Overall mark range</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>Approximately 70% or more</td>
</tr>
<tr>
<td>B</td>
<td>Very Good</td>
<td>Approximately 60% to 69%</td>
</tr>
<tr>
<td>C</td>
<td>Good</td>
<td>Approximately 50% to 59%</td>
</tr>
<tr>
<td>D</td>
<td>Satisfactory</td>
<td>Approximately 40% to 49%</td>
</tr>
<tr>
<td>E</td>
<td>Adequate</td>
<td>Minimum required for award of credits, at least a grade D needed for progression to subsequent courses</td>
</tr>
<tr>
<td>F</td>
<td>Inadequate</td>
<td>Fail</td>
</tr>
</tbody>
</table>

Assessment Results and Progression Decisions
The official mechanism for receiving all your assessment results is on-line. You can find out details at: [https://www.hw.ac.uk/students/studies/examinations/results.htm](https://www.hw.ac.uk/students/studies/examinations/results.htm)

You will officially receive the provisional results of your semester 1 assessments in mid-January. You will receive the final results of your semester 1 & 2 assessments by 10 June (June graduating students) or 1 July (continuing or non-graduating students). Re-assessment results are released no later than 26 August.

The Progression Board meets at the end of the academic year to decide which students will be allowed to proceed to the next year of their degree programme. You will receive notification from the University when your on-line results and the Board’s progression decision are available on-line, and whether you must resit any courses.

In years 1, 2 and 3 if you do not pass a course at the first attempt, you have one opportunity to resit the course during the resit diet in early August. In Year 3, re-assessment is for credit only and you cannot improve your overall average (which accounts for 20% of your final degree results) unless you are re-sitting because of mitigating circumstances. There are no re-sit opportunities for courses in Years 4.

If you receive a pass/proceed decision that allows you to progress at the Summer Progression Board you can enrol on-line from mid-August. If you have resits, and are able to progress following the Resit Progression Board, you may enrol on-line once you have received your Assessment Results.

Final Degree Assessment
The Award Board meets in the last week of May to consider the assessment marks and make recommendations on degree classifications.

Degree Specialism
To graduate with the degree BSc Computer Science (Computer Games Programming) candidates must take the mandatory courses F20GA 3D Graphics and Animation and F20GP Computer Games Programming and do at least one of F20SC Industrial Programming or F20AD Advanced Interaction Design and do an approved dissertation topic suitable for this specialism. You must inform the Academic Head, Steve Gill (S.Gill@hw.ac.uk), at the start of the honours/4th year if you want to exit with this degree specialism.

Graduation
When you have completed your degree your award is conferred at a graduation ceremony. Details on graduation, including how to apply, deadlines for applying and the cost, can be found at: [https://www.hw.ac.uk/students/studies/graduation.htm](https://www.hw.ac.uk/students/studies/graduation.htm).

This website also includes details of gown hire and guest tickets.
**Mitigating Circumstances**
If you experience any Mitigating circumstances which affect your ability to complete your assessments you must notify us as soon as possible.

You should read the University's Policy on Mitigating Circumstances in Relation to Assessment and then complete the application form at: https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm. This form along with any relevant evidence (e.g., medical certificates) should be submitted to the Academic Administration Office.

Evidence submitted after your results have been published cannot be taken into account.

It is **very important** that you notify your personal tutor as soon as possible of any mitigating circumstances, such as illness or bereavement, which could adversely affect your assessment performance. In the case of illness, medical evidence must be supplied to the Academic Administration Office. The Examiners will always take such circumstances into account where appropriate, but the later the notification, the less scope there is to do so.

In particular, notification should be before the examination diet concerned, and certainly no later than the Examiners Meeting. Late notification will mean that either no account can be taken, or that formal procedures have to be invoked. In the latter case, final year students will not be permitted to graduate until these procedures have been completed. For further details, see the University Regulations in Part B of this handbook.

**Thinking of Leaving**
Many students think about leaving university at some stage during their studies. If anything is bothering you or you are thinking about leaving, please speak to a member of staff to explore and understand what you can do.

There may be other options such as additional help (perhaps advice on how to improve your academic skills), a temporary suspension of studies or transferring to another programme.

Further information is available at: https://www.hw.ac.uk/students/studies/leaving.htm

**Complaints and Appeals**
Our aim at Heriot-Watt is to ensure that your experience while studying with us is of the highest quality. However, we recognise that during your time at the University there may be circumstances that occur where you feel you need to make a complaint or to appeal a decision.

Further information is available at: https://www.hw.ac.uk/students/studies/complaints-appeals.htm
### Undergraduate Programme Structure & Notes Template

1. **Programme Code(s) (recruitment & exit awards)**
   - F291-COS

2. **Programme Titles for all awards (unabbreviated)**
   - Computer Science

3. **Main Award(s) (to be recruited to)**
   - BSc Honours

4. **Exit Awards (graduation only)**
   - BSc Honours, BSc Ordinary

5. **Date of Production**
   - 01 June 2017

6. **MANDATORY COURSES**

**Stage 4**
- Student choose 3 courses in semester 1 and 2 courses in semester 2

### 8. ELECTIVES (please provide a detailed description and course lists where possible)

**Stage 1:**

**Stage 2:**

**Stage 3:**

**Stage 4:**

**Stage 5:**

### PROGRAMME NOTES

### 9. COMPOSITION & STAGE NOTES e.g. xx taught Courses (xx mandatory & xx optional)

**Stage 1:**
- 8 taught courses, all mandatory

**Stage 2:**
- 8 taught courses, all mandatory. Direct entrants to Stage 2 and internal transfers from other degrees will be expected have an appropriate background in programming and database technology

**Stage 3:**
- 8 taught courses, all mandatory
- Direct entrants to Stage 3 will be expected have appropriate programming experience and background knowledge.
- Candidates shall pursue a group project throughout the year, which shall be synoptically assessed in conjunction with material from the associated courses (F29SO and F29PD).

**Stage 4:**
- 8 taught courses, 3 mandatory and 5 optional
- In any one year not all optional courses may be offered. Guidance in course choice will be given by academic mentors.
- Candidates are required to undertake an individual dissertation project (F20PA, F20PB, and F20PC) which shall run throughout the year.
10. NOMINAL PASS MARK/GRADE

11. SUMMARY OF ASSESSMENT METHODS *(Expressed as a percentage)*

<table>
<thead>
<tr>
<th>coursework</th>
<th>examination</th>
</tr>
</thead>
<tbody>
<tr>
<td>varies in courses from 100% to 20%</td>
<td>varies in courses from 0% to 80%</td>
</tr>
</tbody>
</table>

Variations in assessment methods across campuses/modes of study are as follows:

12. PROGRESSION REQUIREMENTS

Part A. Minimum number of credits required to progress through each stage are as follows

| Stage 1 to 2: | 120 credits (8 courses) |
| Stage 2 to 3: | 240 credits (16 courses) |
| Stage 3 to 4: | 360 credits (24 courses) and an overall average of 50% or above at the first attempt |
| Stage 4 to 5: |

Part B. Minimum grade D required in the following courses: *(progression requirements exceeding a grade D must be qualified)*

| Stage 1: | Software Development (F27SA), Interactive Systems (F27IS), Logic & Proof (F17LP), Web Design & Databases (F27WD), Introduction to Computer Systems (F27CS), Software Development 2 (F27SB) and Software Development 3 (F27SG) |
| Stage 2: | Interaction Design (F28IN) Web Programming (F28WP), Data Structures & Algorithms (F28DA), Database Management Systems (F28DM), Software Design (F28SD), Programming Languages (F28PL), Discrete Maths (F17SC), Hardware-Software Interface (F28HS) |
| Stage 3: | 6 courses including Software Engineering (F29SO) & Professional Development (F29PD). Re-assessment in Stage 3 is available for credit only and not to improve overall average |
| Stage 4: |

13. RE-ASSESSMENT OPPORTUNITIES

The re-assessment policy for this programme is in line with University Regulations as set out below *(please tick)*

<table>
<thead>
<tr>
<th>Yes</th>
</tr>
</thead>
</table>

*If you have selected "No" please amend the statement below and highlight changes.*

1. A student who has been awarded a Grade E or a Grade F in a course may be re-assessed in that course.
2. A student shall be permitted only one re-assessment opportunity to be taken at the Resit diet of examinations following the first assessment of the course.
3. A student shall not be re-assessed in any qualifying course taken in the final stage of a course of study.
4. The Progression Board may permit a student to be re-assessed in any qualifying course not taken in the final stage in order to gain credits for the course, provided that the mark or grade obtained in the first assessment of any such course is used in determining the classification of the degree to be awarded.
### 14. AWARDS, CREDITS & LEVEL

The awards, credits and level for this programme is in line with University Regulations as set out below (please tick) Yes

*If you have selected "No" please amend the statement below and highlight changes.*

#### Part A. Credit Requirements

<table>
<thead>
<tr>
<th>Level</th>
<th>Credits Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Integrated Masters</td>
<td>N/A</td>
</tr>
<tr>
<td>Honours Degree (inc MA)</td>
<td>480 SCQF credits including a minimum of 180 credits at Level 9 and 10 of which at least 90 credits at Level 10</td>
</tr>
<tr>
<td>Ordinary or General Degree</td>
<td>360 SCQF credits including a minimum of 60 credits at Level 9</td>
</tr>
<tr>
<td>Diploma of Higher Education</td>
<td>240 SCQF credits including a minimum of 90 credits at Level 8</td>
</tr>
<tr>
<td>Certificate of Higher Education</td>
<td>120 SCQF credits including a minimum of 90 credits at Level 7</td>
</tr>
</tbody>
</table>

#### Part B. Mark/Grade Requirements

<table>
<thead>
<tr>
<th>Level</th>
<th>Mark/Grade Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Honours Degree (inc MA)</td>
<td>1\textsuperscript{st}: Weighted Average &gt;=70% over all qualifying courses at grades A-D</td>
</tr>
<tr>
<td></td>
<td>2.1: Weighted Average &gt;=60% over all qualifying courses at grades A-D</td>
</tr>
<tr>
<td></td>
<td>2.2: Weighted Average &gt;=50% over all qualifying courses at grades A-D</td>
</tr>
<tr>
<td></td>
<td>3\textsuperscript{rd}: Weighted Average &gt;=40% over all qualifying courses at grades A-D</td>
</tr>
<tr>
<td>Ordinary or General Degree</td>
<td>Minimum of grade D in all pre-requisite courses</td>
</tr>
<tr>
<td>Diplomas of Higher Education</td>
<td>Minimum of grade D in all pre-requisite courses</td>
</tr>
<tr>
<td>Certificate of Higher Education</td>
<td>Minimum of grade D in all pre-requisite courses</td>
</tr>
</tbody>
</table>

These are default marks/grades. The Board of Examiners may exercise some discretion in accordance to University Regulations.

#### Part C. Additional Award Requirements

Honours degree classification is determined by performance in:
- Stage 3 averaged over all 8 courses (20%) at the first attempt
- The 5 assessed courses in Stage 4 (50%)
- The individual dissertation project in Stage 4 (30%)

10. Date of Production/Revision
13 March 2009

11. Educational Aims of the Programme
The educational aim is to provide students with a theoretical foundation and applied skills in Computer Science in addition to other professional skills which will enable graduates to communicate clearly, work independently and co-operate effectively. The balance of skills will enable graduates to work effectively and efficiently in industry and commerce and prepare them for postgraduate study.

12. The Programme provides opportunities for learners to achieve the following outcomes:

<table>
<thead>
<tr>
<th>Understanding, Knowledge and Cognitive Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>• To develop knowledge and skills in the elicitation and analysis of user requirements, design and evaluation of solutions, and the implementation and quality assurance of the chosen solution.</td>
</tr>
<tr>
<td>• To be able to develop well-structured, efficient, usable and well-documented programs.</td>
</tr>
<tr>
<td>• To know what general classes of problems are amenable to computer solution and be able to select the appropriate tools required for particular problems.</td>
</tr>
<tr>
<td>• To be able to develop an abstract model for a given problem and devise appropriate mechanized techniques to solve the problem.</td>
</tr>
<tr>
<td>• To develop the knowledge and skills required to meet the challenges of emerging technologies and methodologies.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Scholarship, Enquiry and Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>• To gain an in depth understanding of the theoretical foundations of computation and its relevance to everyday computing.</td>
</tr>
<tr>
<td>• To be able to design, implement, document, verify and validate relatively large heterogeneous software systems.</td>
</tr>
<tr>
<td>• To be able to assess the quality of software systems, both in terms of their functional and non-functional properties.</td>
</tr>
</tbody>
</table>
**Personal Abilities**

- Industrial, Commercial and Professional Practice
  - To maintain and update technical knowledge; to take responsibility for personal and professional development.
  - To appraise the impact of computers on society and the influence of society on the development of the technology and use of computers.
  - To assess aspects of the law related to computer-based information, or the role of standards in safety, quality and security, of security issues and of the BCS Codes of Practice and Conduct.

- Autonomy, Accountability and Working with Others
  - To undertake self-directed work; to assimilate information from multiple sources; to examine results and generate conclusions; to impart ideas effectively in visual, verbal or written form.
  - To work effectively either individually or as part of a team.
  - To apply subject-mastery outcomes to monitor, analyse, model, specify, design, communicate, implement, evaluate, control and plan.
  - To be aware of, and be able to respond to, the social and legal implications and consequences of the use of computers.
  - To be able to analyse problem spaces; develop and work with abstractions; appraise material and ideas; to apply a methodical and innovative approach to problem solving; to integrate theory and practice

- Communication, Numeracy and ICT
  - To be able to communicate with peers, more senior colleagues and specialists. In addition, communicate using appropriate methods to a range of audiences, i.e. specialists and non-specialists.
  - To be able to undertake critical evaluation/analysis of a wide range of numerical and graphical data.

---

**13. Approaches to Teaching and Learning:**

Lectures, Tutorials (practicals, laboratories), Coursework, (assignments, individual projects, group projects, essays, reports, presentations, log/journals, dissertation), Self-study are linked to lecture-based, resource-based and problem-based teaching styles, to relate with motivational, assimilative, consolidative and evaluative phases of learning.

Approaches to teaching and learning are continually reviewed and developed with the aim of matching them to the abilities and experiences of students, with regard also for the subject area. Specific details about teaching and learning methods are provided in the appropriate module descriptors.
14. Assessment Policies:

The following assessment methods are used:

*Understanding, knowledge and subject specific skills* are assessed through the range of methods reflected by *written examinations, coursework assignments, software artefacts, group and individual projects, written reports and oral presentations*. *Diagnostic, formative, continuous and summative* types of assessment aim to correlate with methods of assessment.

Approaches to assessment are continually reviewed. Specific details about methods of assessment are provided in the appropriate module descriptors.
BSc Computer Science

Course Descriptors

Year 1, Semester 1
<table>
<thead>
<tr>
<th>Course Code: F27PX</th>
<th>Course Title: Praxis</th>
<th>Course Co-ordinator: S Gill</th>
</tr>
</thead>
</table>

### Pre-requisites:

### Aims:
- To instruct students in undertaking self-directed study
- To instruct students in presenting their findings
- To acquaint students with the work of the department
- To deepen students' understanding of the degree courses for which they are registered
- To familiarise students with the computer systems used by the department
- To present skills that students could useful use to become successful students

### Syllabus:
- Writing reports; sources and referencing; group presentation; the matter of plagiarism
- Current departmental research
- Exploration of the departmental computer system
- Study skills

### Learning Outcomes:
- **Subject Mastery**
  - Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
  - Acquaintance with new research in computing
  - Consideration of difficult and even perplexing ideas in their chosen field of study
  - Knowledge of and ability to use departmental computer systems

- **Personal Abilities**
  - Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
  - Undertaking responsibility for self-directed research
  - Assimilating information from multiple sources
  - Analysing results to formulate conclusions
  - Writing reports to professional standards
  - Constructively evaluating the work of peers
  - Reacting sensibly to peer evaluation
  - Re-writing work in response to criticism
  - Co-operating in a group to investigate a complex topic
  - Making spoken and visual presentations
  - Acquiring study skills that can be used for both academic studies and later in a professional context

### Assessment Methods:
- Assessment: Coursework: (weighting – 100%)
- Re-assessment: Coursework: 100%

<tr>
<td>------------</td>
<td>----------------------------------</td>
</tr>
</tbody>
</table>

**Pre-requisites:** None

**Aims:** To give students an opportunity to explore current technological media and creative approaches

**Syllabus:**
- Basic comparison and evaluation of designs and prototypes
- Reflecting on one’s own learning and progress
- Development of Interactive Systems, for example
  - Web site development: page layout, navigation, graphics, animation/interaction
  - Game development using a current game authoring tool: level design, storyline, game mechanics

**Learning Outcomes:**

**Subject Mastery**
- Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
  - To give students experience of designing and developing an interactive system.
  - To give students experience of evaluating and critiquing interactive systems.

**Learning Outcomes:**

**Personal Abilities:**
- Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
  - To gain an awareness of the benefits and pitfalls of different approaches to multimedia project work
  - To raise awareness of the legal and ethical responsibilities within the discipline
  - To appreciate and enjoy the challenges of creative work (PDP)
  - To take responsibility for one’s own learning and managing workload (PDP)
  - For students to appreciate their own strengths and weaknesses, and what is possible within time constraints (PDP)
  - To develop skills in written, oral and media based communication (PDP)
  - To present solutions to design challenges in the subject area (PDP)
  - To develop experience and skills in giving and receiving constructive criticism (PDP)

**Assessment Methods:**

**Assessment:**
- Coursework: (weighting – 100%)

**Re-assessment:**
- Coursework: (weighting – 100%)
<table>

<td>F17LP</td>
<td>Logic &amp; Proof</td>
<td>H Zantout</td>
</tr>
</tbody>
</table>

**Pre-requisites:** None

**Aims:** To give an introduction to and an appreciation of the basic principles and techniques of logic and proof fundamental to Computer Science.

**Syllabus:**
- Logic and proof
- Propositional calculus
- Truth tables, predicate calculus
- Inference rules
- Soundness
- completeness
- Validity
- Satisfiability
- Reasoning and calculating with propositions
- Practical applications

**Learning Outcomes:**

**Subject Mastery**
- Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
- To demonstrate an understanding of the principles of propositional and predicate calculus.
- To foresee the role of argument in logical reasoning.
- To be able to formulate statements as well formed formulae in propositional and predicate calculus.
- To be able to construct formal proofs of logical arguments.

**Learning Outcomes:**

**Personal Abilities**
- Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
- To be able to express arguments/problems in propositional and predicate calculus.
- To be able to communicate in using formal notations

**Assessment Methods:**
- Assessment:
  - Examination: (weighting – 70%)
  - Coursework: (weighting – 30%)
- Re-assessment:
  - Examination: (weighting – 100%)

</tbody>
</table>

**Pre-requisites:** None

**Aims:**
- To introduce students to modern computer systems architecture
- To give students an appreciation of logical design and data representation

**Syllabus:**
- Overview
- Hardware components - peripherals, memory & CPU.
- Boolean algebra.
- Low-level information representation.
- CPU organisation.
- Introductory assembly language programming.
- Operating system: I/O; interrupts; scheduler; virtual memory; file system.
- Concurrency: processes; threads; synchronisation; shared & distributed memory; distributed & parallel architectures.
- Language processors: compiler; interpreter; assembler; loader.
- Linux shell scripting

**Learning Outcomes: Subject Mastery**
*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*
- Overview of hardware/software hierarchy in contemporary computer systems;
- Understanding of purpose and function of major system hardware and software components;
- Understanding of information representation in computer systems;
- Ability to write Linux shell scripting

**Learning Outcomes: Personal Abilities**
*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*
- Appreciation of significance of hardware & system software in supporting computer applications
- Basic ability to understand hardware and software specifications

**Assessment Methods:**
- Assessment:
  - Examination: (weighting – 70%)
  - Class tests: (weighting - 20%)
  - Coursework: (weighting -10%)
- Re-assessment:
  - Examination: (weighting – 100%)
<table>
<thead>
<tr>
<th>Course Code: F27WD</th>
<th>Course Title: Web Design and Databases</th>
<th>Course Co-ordinator: T Shaikh</th>
</tr>
</thead>
</table>

**Pre-requisites:** None

**Aims:** To develop knowledge and understanding of fundamental web design concepts and combine these with database structuring and querying techniques applying this knowledge by implementing an easy-to-use website.

**Syllabus:**
- Introduction to web development.
- Information architecture.
- Web design and usability.
- Fundamentals of Mark-up and CSS.
- Introduction to database systems.
- Databases and Information Systems.
- Modelling of data/entity-relationship modelling.
- The relational data model.
- The Structured Query Language (SQL).
- Web-based database applications including the use of PHP.

**Learning Outcomes:**

**Subject Mastery**
- Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
  - To explain fundamental web design concepts including usability.
  - To implement a simple web site which satisfies current standards and uses a database.
  - To describe the use of CSS and mark-up within a web site and the advantage this gives the developer.
  - To describe the need for standard XHTML and how this aids cross browser compatibility.
  - To have knowledge and understanding of data analysis and structuring techniques.
  - To design database structures as a relational data model.
  - To implement and query a designed database structure through a web site.

**Personal Abilities:**
- Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
  - To analyse complex information and organise it in a structured way for a web site.
  - To understand stakeholders’ requirements and address them.
  - To design a web site that is easy and cost efficient to manage.
  - To analyse data sources and represent them in an efficient structured form.
  - Problem solving (PDP).
  - Paired work (PDP).
  - Time management (PDP).
  - Reflection, constructive criticism and learning from peers (PDP).

**Assessment Methods:**
- Assessment: Examination: (weighting – 60%)
  - Coursework: (weighting – 40%)
- Re-assessment: Examination: (weighting – 100%)

| **Syllabus:**      | - Static structures – tables  
 |                     - Linear techniques e.g. Search, delete, update  
 |                     - String & text processing  
 |                     - Dynamic structures - stacks & queues  
 |                     - Recursive techniques – linear recursion, accumulation recursion  
 |                     - Sorting & searching e.g. Binary search, quicksort, merge sort, hash tables  
 |                     - Linked structures – lists – construction, traversal, delete, update  
 |                     - Linked structures – trees – construction, traversal, delete, update, balance  
 |                     - File processing  
 |                     - Introductory complexity & “big o” notation |                                  |
| **Learning Outcomes: Subject Mastery** | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning) |                                  |
|                     | - To understand properties of and algorithms for fundamental static, dynamic and linked data structures  
 |                     - To know when to deploy fundamental data structures and algorithms in practical problem solving  
 |                     - To gain mastery of fundamental linear and recursive programming techniques  
 |                     - To know when to deploy linear and recursive programming techniques in practical problem solving  
 |                     - To understand fundamental techniques for processing very large data sets from files  
 |                     - To gain skill in elementary analyses of fundamental algorithms and data structures to give insight into their time and space complexity bounds  
 |                     - To understand correspondences between different programming techniques  
 |                     - To understand correspondences between different data structures and algorithms |                                  |
| **Learning Outcomes: Personal Abilities:** | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT |                                  |
|                     | - To understand how the choice of algorithms and data structures determines the efficacy of proposed solutions to problems  
 |                     - To be able to explain the implications of choosing particular algorithms and data structures for the time and space behaviour of solutions |                                  |
| **Assessment Methods:** | Assessment:  
 Examination: (weighting – 50%)

<table>
<thead>
<tr>
<th>Course Code: F28IN</th>
<th>Course Title: Interaction Design</th>
<th>Course Co-ordinator: H Zantout</th>
</tr>
</thead>
</table>

**Pre-requisites:** F27IS Interaction Systems or equivalent

**Aims:** The course aims to give students the opportunity to develop:
- A broad knowledge and understanding of requirements gathering, design and evaluation theory and techniques in interaction design.
- An introduction to commonly used design techniques and pattern for user interfaces.
- A selection of routine skills and methods involved in working with users.

**Syllabus:** Current topics in Interaction Design including: interaction design lifecycles, user interface design patterns, basic qualitative and quantitative data gathering and presentation techniques, accessibility.

**Learning Outcomes:**

**Subject Mastery**

*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*
- Critically analyse interaction design and interfaces.
- Propose solutions in response to interface design problems.
- Evaluate the effectiveness of user interfaces with respect to user requirements.

**Learning Outcomes:**

**Personal Abilities**

*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*
- Use discipline appropriate software for data analysis,
- Present, analyse and interpret simple numerical and graphical data gathered as part of evaluation studies. (PDP)
- Communicate effectively to knowledgeable audiences by preparing informal presentations and written reports. (PDP)
- Exercise autonomy and initiative by planning and managing their own work within a specified project; (PDP)
- Take responsibility for their own and other’s work by contributing effectively and conscientiously to the work of a group (PDP)

**Assessment Methods:**

Assessment:
- Examination: (weighting – 60%)
- Coursework: (weighting – 40%)

Re-assessment:
- Examination: (weighting – 100%)

| Aims:              | To gain understanding of different language paradigms  
|                    | To gain understanding of defining concepts of programming languages  
|                    | To develop skills in programming in languages from key paradigms |
| Syllabus:          | Overviews of language history, definition (lexicon, syntax, semantics), implementation (compiler, interpreter, virtual machine)  
|                    | Overviews of language paradigms: e.g. imperative (high-level, system, low-level), declarative (functional, logic), concurrency/parallelism  
|                    | Overviews of programming language concepts: variable, lvalue & rvalue, assignment (sharing/copying), data abstraction (sequential, structured, recursive, shared/distributed), type mechanisms (weak/strong, static/dynamic, ad-hoc/parametric polymorphism), declaration (scope, extent), control abstraction (sequence, choice, repetition, block, procedure, labels/jumps, exceptions, processes), expression abstraction (functions), parameter mechanisms (value, reference), evaluation mechanisms (strict/lazy, ordered/unordered, concurrent)  
|                    | An introduction to programming in languages from key paradigms e.g.  
|                    | - scripting: e.g. Python  
|                    | - declarative/functional: e.g. SML  
|                    | - declarative/logic: e.g. Prolog |
| Learning Outcomes: | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
| Subject Mastery:   | Understanding of distinguishing characteristics of language paradigms  
|                    | Understanding of relationships between languages  
|                    | Understanding of generic language concepts  
|                    | Ability to program in languages from key paradigms  
|                    | Ability to use tool sets for these languages |
| Learning Outcomes: | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT |
| Personal Abilities | Understanding of how to choose an appropriate language for different problem domains |
| Assessment Methods: | Assessment: Examination: (weighting – 70%)  
|                    | Coursework: (weighting – 30%)

| **Aims:** | ♦ To introduce core algorithms and data structures used in a wide range of applications in Computer Science  
♦ To further develop skills in algorithm and data structure design, and the development of medium sized programs |
| **Syllabus:** | ♦ Algorithm and data structure topics including: advanced trees, string processing, graphs, hash tables  
♦ Algorithm/data structure choice, design and deployment |
| **Learning Outcomes:** | *Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*  
♦ Ability to analyse and hence choose suitable algorithms and data structures for a given problem  
♦ To design and implement medium sized programs based on a range of standard algorithms and data structures and making appropriate use of libraries  
♦ Understanding the distinction between abstract Algebraic Data Type (ADT) properties and concrete ADT realisations  
♦ Appreciation of need for integration of multiple ADTs in substantial programs  
♦ Appreciation of efficiencies/reassurances from ADT reuse |
| **Learning Outcomes:** | *Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*  
♦ To be able to critically analyse and hence choose suitable algorithms and data structures for a given problem  
♦ To be able to convey the advantages and disadvantages of alternative data structures and algorithms  
♦ To develop practical problem-solving skills in the context of programming  
♦ To be able to plan & execute a substantial software |

<thead>
<tr>
<th>Course Code: F28WP</th>
<th>Course Title: Web Programming</th>
<th>Course Co-ordinator: S Kumar</th>
</tr>
</thead>
</table>

**Pre-requisites:** F27WD Web Design and Databases or equivalent

**Aims:** To familiarise students with current techniques and paradigms in web programming. To enable them to design and implement robust and scalable web based applications.

**Syllabus:**
- History of web development technologies
- Design patterns (such as REST, Separation of content and presentation, and abstraction of resources)
- Server side programming using an appropriate scripting language
- General architecture of a web server
- Templating systems
- Client side programming topics, including the Document Object Model
- Security relating to web applications
- Deployment, including coping with scale

**Learning Outcomes:**

**Subject Mastery**
- Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
- Broad knowledge and understanding of the history of web programming
- The ability to apply the concepts, patterns and architectures used in web programming to new problems
- Detailed technical skills to use a scripting language for both server side and client side programming
- The ability to make informed decisions about appropriate web technologies to use for a particular task

**Personal Abilities**
- Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
- Practice in working on a development project in a small group under the guidance of a tutor
- Practice in defining the subject and scope of a development project (PDP)
- Deconstructing a problem and synthesizing a solution
- Time management

**Assessment Methods:**
- Assessment:
  - Examination: (weighting – 50%)
  - Coursework: (weighting – 50%)
- Re-assessment:
  - Examination: (weighting – 100%)
<table>
<thead>
<tr>
<th>Course Code: F28SD</th>
<th>Course Title: Software Design</th>
<th>Course Co-ordinator: S Kumar</th>
</tr>
</thead>
</table>

**Pre-requisites:** F27SA – Software Development 1 OR equivalent

**Aims:**
- An introduction to a range of processes and methods that promote the design of high quality software systems.
- A perspective of where design sits within the development life-cycle

**Syllabus:**
- Software process models;
- Architectural styles;
- Design methods and associated notations – including function-oriented, object-oriented and component-based design; design patterns;
- Software development life-cycle issues, with particular focus on requirements engineering, validation and verification (testing).

**Learning Outcomes: Subject Mastery**
- Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
  - To demonstrate a critical understanding of software process models and design methods.
  - To be able to develop design solutions using a range of structured notations.
  - To demonstrate a critical understanding of the context in which software design takes place, in particular requirements engineering and the activities of validation and verification (testing).

**Learning Outcomes: Personal Abilities**
- Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
  - Take responsibility for own work and exhibit critical reflection on development process. (PDP)
  - To be able to use appropriate methods and standards for practice and documentation in software engineering and information systems.
  - Demonstrate evidence based approaches to problem solving.
  - Use a range of numerical and graphical skills in evaluating and communicating ideas, as well as measuring progress toward achieving goals.

**Assessment Methods**
- Assessment:
  - Examination: (weighting – 60%)
  - Coursework: (weighting – 40%)
- Re-assessment:
  - Examination: (weighting – 100%)

</table>
| Syllabus:          | **Set Theory and Combinatorics:** Set algebra, The Inclusion-Exclusion Principle, Binomial Theorem, Elementary counting methods, Mathematical Induction. (6 lectures)  
|                    | **Graph Theory 1:** Introduction to graphs, Basic graph terminology. Adjacency Matrices, Paths and connectivity, Connected components, Shortest path problems in weighted graphs, Dijkstra’s Algorithm. (5 lectures)  
|                    | **Graph Theory 2:** Trees and spanning trees, Breadth-first search, Kruskal’s and Prim’s Algorithms for a minimal spanning tree, Euler and Hamilton paths, Fleury’s Algorithm for constructing Euler circuits, Prefix Codes and Huffman Coding. (6 lectures)  
|                    | **Recurrence Relations:** Solving problems by iteration, First and second order recurrence relations, Recurrences in Algorithms (3 lectures)  
|                    | **Matrices and Linear Transformations:** Linear equations and elementary row operations, Elementary matrices and Gaussian elimination, Echelon matrices, Matrices as space transformations, Eigenvectors and eigenvalues, Diagonalization, The rank theorem. (8 lectures)  
|                    | **Probability Theory:** Probability Space, Conditional Probability, Independence and Bayes’ Theorem, Random Variables and Distributions, Expected Value, Variance, Examples of applications to algorithms (5 lectures). |
| Learning Outcomes: | Subject Mastery  
|                    | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
|                    | **Know the basic terminology of set theory, graph theory, linear algebra and probability theory**  
|                    | **Understand how formal mathematical objects like sets, graphs, matrices, recurrence relations arise in computer science related problems**  
|                    | **Be able to solve elementary counting problems, solve systems of linear equations, apply graph algorithms, solve simple recurrence relations, be able to compute probabilities**  
|                    | **Appreciate the power of mathematical formalisation, facilitated by the use of precise definitions and notations, in solving practical problems.**  
|                    | **Appreciate the value of careful, quantitative reasoning in analysing problems related to computer science and to recognise that the outcome of such reasoning can defy naïve intuition**  
| Learning Outcomes: | Personal Abilities:  
|                    | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT  
|                    | **Understand and use abstract mathematical concepts**  
|                    | **Use logical reasoning to prove theorems**  
|                    | **Communicate mathematical orally and in writing**  
| Assessment Methods | Assessment: Examination: (weighting – 70%)  
|                    | Coursework: (weighting – 30%)

<tbody>
<tr>
<td>F29AI</td>
<td>Artificial Intelligence &amp; Intelligent Agents</td>
<td>T Shaikh</td>
</tr>
</tbody>
</table>

**Pre-requisites:**
Elementary knowledge of logic at the level of undergraduate Computer Science. Knowledge of high-level programming language concepts.

**Aims:**
- To introduce the fundamental concepts and techniques of AI, including planning, search and knowledge representation
- To introduce the scope, subfields and applications of AI, topics to be taken from a list including natural language processing, expert systems, robots and autonomous agents, machine learning and neural networks, and vision.
- To develop skills in AI programming in an appropriate language

**Syllabus:**
- Search algorithms (depth first search, breadth first search, uniform cost search, A* search)
- Constraint satisfaction problems
- Games (min-max, alpha-beta pruning)
- Logic, resolution, introductory logic programming
- Knowledge representation – logic, rules, frames
- Goal and data-driven reasoning
- Practical rule-based programming
- Overview of main fields of AI (Vision, Learning, Knowledge Engineering)
- In depth view of one field of AI (e.g. Planning, Natural language)
- Autonomous agents
- Applications of AI
- AI programming

**Learning Outcomes:**
**Subject Mastery**
*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*
- Critical understanding of traditional AI problem solving and knowledge representation methods
- Use of knowledge representation techniques (such as predicate logic and frames).
- Critical understanding of different systematic and heuristic search techniques
- Practice in expressing problems in terms of state-space search
- Broad knowledge and understanding of the subfields and applications of AI, such as computer vision, machine learning and expert systems.
- Detailed knowledge of one subfield of AI (e.g. natural language processing, planning) and ability to apply its formalisms and representations to small problems
- Detailed understanding of different approaches to autonomous agent and robot architectures, and the ability to critically evaluate their advantages and disadvantages in different contexts.
- Practice in the implementation of simple AI systems using a suitable language

**Learning Outcomes:**
**Personal Abilities**
*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*
- Identification, representation and solution of problems
- Time management and resource organisation
- Research skills and report writing
- Practice in the use of ICT, numeracy and presentation skills

**Assessment Methods:**
**Assessment:**
Examination: (weighting – 70%)
Coursework: (weighting – 30%)

**Re-assessment:**
Examination: (weighting – 100%)

| Aims:             | ♦ To equip students with knowledge and skills for the effective management of a group project which encompasses the software development lifecycle  
♦ To enable students to reinforce their knowledge and skills gained in software processes, internet technology, database management and interaction design  
♦ To build students understanding, knowledge and skills in teamwork, software development in groups, and project planning.  
♦ To enable students to develop a broader understanding of the interrelationship of development life-cycles and a critical capability in the selection of tools and methods to support project planning, systems analysis, requirements capture, and system specification. |
| Syllabus:         | ♦ Review and extension of the components studied in earlier years which contribute to the group project  
♦ Software project management including working in groups, project planning and costing, risk assessment  
♦ Use of Industry-level Standards for software development and documentation, covering aspects such as change control and requirements traceability  
♦ Further study of software development tools, especially version control |
| Learning Outcomes: | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning) |
| Subject Mastery   | ♦ A broad and integrated understanding and knowledge of the various development and programming paradigms, software development life-cycles, teamwork and project planning  
♦ Detailed theoretical and practical knowledge of the use of methodologies for requirements capture, iterative design, resource capture and management, deployment and evaluation of systems, at a basic level  
♦ Practice in the use of object-oriented programming, databases, scripting and markup languages applied to a substantial project |
| Learning Outcomes: | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT |
| Personal Abilities: | ♦ Identification, critical analysis and evaluation of the development of a software system (PDP)  
♦ Practice in working in a group, negotiating requirements, reaching a consensus, taking responsibility for own work, taking part in a presentation, and working with others to a deadline (PDP)  
♦ Appreciation of the interrelationship of knowledge domains |

**Pre-requisites:**
F28WP Web Programming

**Aims:**
- Introduction to data communications and computer networking
- Understanding of the structure of Internet
- Understanding of concepts of connection oriented and connectionless communication, and principles of data communication protocols

**Syllabus:**
- Internet history and organisation, OSI and Internet reference models.
- Link level communications, data transparency, error detection, sliding window protocols
- Network layer protocols, IP, ICMP
- Network routing, routers
- Transport protocols, TCP, UDP
- Congestion control
- Higher level protocols e.g. HTTP (simple example only)

**Learning Outcomes:**

**Subject Mastery**
*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*
- Understanding of data communication protocols,
- Appreciation of necessity for formal specification and verification of protocols.
- Appreciation of complexity of network infrastructure and sensitivity to parameter choices

**Learning Outcomes:**

**Personal Abilities**
*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*

**Professional Development**
- Appreciation of role of standards in networking
- Appreciation of precision and need for validation in specification of data communication protocols

**Practical Expertise**
- Ability to analyse and explain basic issues relating to communication and networking technologies
- Practice in ICT, numeracy and report writing, team working

**Assessment Methods:**

Assessment:
- Examination: (weighting – 75%)
- Coursework: (weighting – 25%)

Re-assessment:
- Examination: (weighting – 100%)
<table>

### Pre-requisites:

- To give an introduction to and an appreciation of the basic principles and techniques of logic and proof fundamental to Computer Science.
- Introduce the λ-calculus, how computable functions are represented in the λ-calculus, basic theoretical properties of the λ-calculus, and the relevance of the λ-calculus to computer science.

### Aims:

- Lambda calculus: syntax, notation, bound & free variables and α-conversion and substitution, reduction and computation, representing computable functions, theoretical properties.

### Syllabus:

**Logic & Proof**
- Propositional calculus
- Predicate calculus
- Inference rules
- Soundness
- Completeness
- Validity
- Satisfiability
- Reasoning
- Calculating with propositions

**Lambda Calculus**
- Syntax
- Notation
- Bound and free variables
- α-conversion and substitution
- Reduction
- Computation
- Representing computable functions

### Learning Outcomes: Subject Mastery

- To demonstrate an understanding of the principles of propositional and predicate calculus.
- To foresee the role of argument in logical reasoning.
- Practice in formulating and proving arguments using formal logic
- Knowledge of lambda calculus
- Understanding of different variable techniques (de Bruijn indices, combinator variables)
- Understanding of variable binding and capture-free substitution
- Knowledge of how to represent computations in the λ-calculus

### Learning Outcomes: Personal Abilities

- To be able to formulate statements as well formed formulae in propositional and predicate calculus.
- To be able to express arguments/problems in propositional and predicate calculus.
- To be able to construct formal proofs of logical arguments.
- To be able to think about the meaning of programs mathematically

### Assessment Methods:

- Assessment:
  - Examination: (weighting – 70%)
  - Coursework: (weighting – 30%)  

- Re-assessment:
  - Examination: (weighting – 100%)

**Pre-requisites:**
F29SO Software Engineering (Synoptic)

**Aims:**
- To instil a professional and ethical attitude toward the application of computer technology
- To introduce methods for the rational resolution of ethical problems
- To provide an appreciation of the relevant professional and legal requirements concerning computer-based systems
- To ensure an awareness of, and encourage deliberation about, the social implications of information technology

**Syllabus:**
- **Professionalism** - British Computer Society.
- **Rules & Regulations** - Codes & Standards; Computer Law; Ethical Decision Making.
- **Risks & Threats** - Computer Crime; Viruses.
- **Privacy & Security** - Databases; Biometrics.
- **Dependence & Change** - Safety-Critical Systems; Technology & Society.
- **Brave New Worlds** - Co-operative Computing; eLife.

**Learning Outcomes:**

**Subject Mastery**
Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)

- Broad and integrated knowledge and understanding of:
  - **British Computer Society Codes** - Conduct; Practice
  - **ISO & BSI Standards** - Safety; Quality; Security
  - **Statute Law** - Contracts, Torts, Restitution; Data Protection; Freedom of Information, Intellectual Property; Computer Misuse
  - **Ethics** - Frameworks; Decision Making

- Critical understanding and detailed knowledge of:
  - Development life-cycle of a software system
  - Bi-directional influence between technological and societal trends
  - Current concerns over the application of computer technology
  - Current and potential remedies to abuse of computer technology

**Personal Abilities:**
- **Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT**
- Practice in personal decision making and introspection
- Identification and analysis of justification of personal choices to others
- Critical analysis of rational reasoning, consequential reasoning and debate
- Practice and reflective analysis of communication skills using a variety of media
- Practice in working in a group, negotiating requirements, reaching a consensus, and working with others to a deadline

**Assessment Methods:**
- **Assessment:**
  - Group Project: (weighting – 50%)
  - Examination: (weighting – 40%)
- **2 hour synoptic Examination with F29SO**
- Coursework: (weighting – 10%)

- **Re-assessment:**
  - Coursework: (weighting – 100%)

| Aims: | ♦ For the Operating system part: To provide an introduction to operating systems, their basic principles and shell programming.  
♦ For the Concurrency part: To introduce the theory and practice of concurrent hardware and software systems |
| Syllabus: | ♦ For the Operating system part: overview on operating systems concepts and structures, processes, threads, classical inter-process communication problems, memory management  
♦ For the Concurrency part: Concurrency, Parallelism, Pthreads. Parallelism Pattern: Pipelining, Data-Parallelism, Nested Data-Parallelism, Flattening, Task-Parallelism, Data-Flow. |
| Learning Outcomes: Subject Mastery | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning) |
| For the Operating systems part: | ♦ Understanding of the concepts and structures present in modern operating systems. |
| For the Concurrency part: | ♦ Broad and integrated knowledge and understanding of concurrency concepts, techniques and problems  
♦ Critical understanding of predominant concurrency pattern and their implementation on modern architectures  
♦ Hands-on experience |
| Learning Outcomes: Personal Abilities: | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT |
| | ♦ Critically evaluate the problematic and concepts related to operating systems.  
♦ Analysis of the different possible solutions to leveraging concurrency for parallel execution. |
| Assessment Methods | Assessment:  
Examination: (weighting – 60%)  
Coursework: (weighting – 40%)

| Aims: | ♦ To develop skills in programming language definition  
♦ To develop skills in programming language implementation |
| Syllabus: | Language definition:  
♦ lexicon: non-terminal & terminal symbols, type 3 grammars, regular expressions, finite state automata, Moore & Mealey machines, left & right recursion  
♦ concrete syntax: type 2 grammars & BNF, factoring grammars, converting left to right recursion, LL(K) & LR(K) grammars, push down automata, parsing  
♦ abstract syntax: abstract syntax from concrete syntax  
♦ static semantics: types  
♦ dynamic semantics: overviews of axiomatic, denotational & operational semantics; introduction to structural operational semantics (SOS) for declarations, expressions, statements  
Language implementation:  
♦ lexical analysis  
♦ syntax analysis: recursive descent for LL(1)  
♦ abstract syntax tree (AST) construction  
♦ AST pretty printing  
♦ overview of interpreter/abstract machine  
♦ AST interpretation  
♦ static analysis of AST: e.g. type checking, identifier resolution  
♦ code generation e.g.: register/memory allocation, structured constructs as test/jump, structured data as structured memory sequences, stack discipline for blocks/subroutines, parameter passing  
♦ run time environment: e.g. heap allocation, garbage collection, debugging support  
♦ compiler construction tools e.g. Lex, Yacc, JavaCC  
Based on simple imperative language |
| Learning Outcomes: Subject Mastery | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
♦ Ability to construct & manipulate lexical & syntactic definitions  
♦ Understanding of relationship between grammars & automata  
♦ Ability to construct lexical & syntactic analysers from definitions  
♦ Familiarity with static & dynamic semantics, and associated formalisms  
♦ Ability to generate & traverse ASTs  
♦ Ability to construct AST-based analysers, interpreters & code generators for simple languages  
♦ Understanding of run-time environments  
♦ Ability to use compiler construction tools |
| Learning Outcomes: Personal Abilities | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT  
♦ Appreciation of problem solving as language definition & implementation  
♦ Ability to apply appropriate language oriented formalisms, tools & techniques in solving problems  
♦ Skills in engineering complex software artefacts |

Pre-requisites: Fundamental knowledge of computer networking, formal methods and Java programming

Aims:
- Impart critical understanding of key concepts, issues, theories and principles of computer network security.
- Develop detailed theoretical and practical knowledge of foundational issues in computer network security.
- Provide detailed understanding and practical experience with key services and tools used for computer network security purposes.
- Give practical experience of analysing requirements, designing, implementing and testing security solutions for computer network applications.

Syllabus:
- Security concepts and definitions, basics of cryptography (concepts, definitions, steganography), symmetric cryptography (historical, hash functions, MACs, block and stream encryption), asymmetric cryptography (basic number theory, RSA, DH, digital signatures), cryptographic key management, operating system security (concepts, memory management, buffer overflow, race conditions, file/disk encryption), security-enhanced Linux, authentication & access control (biometrics, passwords, role- and capability-based), as well as some Linux-based security tools (e.g., GPG, openssl).
- Computer network security concepts, X.800 model - attacks, mechanisms, services.

Learning Outcomes:
**Subject Mastery**
- Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)
- Detailed and critical understanding of the concepts, issues, principles and theories of computer network security
- Critical theoretical and detailed practical knowledge of a range of computer network security technologies as well as network security tools and services
- Practical experience of analysing, designing, implementing and validating solutions to computer network security challenges using common network security tools and formal methods

**Personal Abilities**
- Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT
- Ability to deal with complex issues and make informed judgements about network security in the absence of complete or consistent data.
- Exercise substantial autonomy and initiative in addressing computer network security challenges.
- Showing initiative and team working skills in shared computer network security application development. (PDP)
- Demonstrate critical reflection on network security issues. (PDP) learning through case studies
- Report writing and demonstrating argument development
- Use of VLE as a means of learning, contributing and discussing

Assessment Methods:
- Examination: (weighting – 60%)
- Coursework: (weighting – 40%)
- Re-assessment: None
<table>
<thead>
<tr>
<th>Course Code: F20GA</th>
<th>Course Title: 3D Graphics and Animation</th>
<th>Course Co-ordinator: TBC</th>
</tr>
</thead>
</table>

**Pre-requisites:** F27SG Software Development 3 or equivalent (object-orientated programming).

**Aims:** Investigate Computer Graphics theory and develop programming skills in 2D/3D Graphics and Animation.

**Syllabus:**
- Vertices, triangles, meshes, display lists and models.
- Hierarchical modelling and scene graphs understanding and representation.
- 2D and 3D transformations, homogeneous co-ordinates, matrices multiplication.
- Model, world, camera, scene and projection spaces.
- Instancing and tessellation.
- Materials, texture mapping and shading.
- Lighting and global illumination models.
- Shadows, occlusions and reflections.
- Real-time and offline rendering pipelines.
- Basics of procedural and physical animations.
- Animation systems and concepts.
- Animation skeletons, poses, clips, skinning and blending.
- Tools, environments, coding practices and industrial applications.
- Course summary and review.

**Learning Outcomes: Subject Mastery**
*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*
- Understanding and categorising Computer Graphics concepts.
- Ability to identify core 3D elements and structures.
- Investigation of scene graphs, hierarchical models, and spaces.
- Understanding and research into transformations, modelling, and projection concepts.
- Ability to contrasts different material, lighting and shadowing models.
- Develop and implement animation concepts and systems.
- Ability to design, understand and implement a small-scale rendering and animation system.

**Learning Outcomes: Personal Abilities**
*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*
- Ability to think, plan, and construct in three dimensions.
- Representation of, planning for, and solution of problems.
- Ability to plan, design and implement a rendering and animation system.
- Skills integrating graphics and animation in various industries.

**Assessment Methods**
- Assessment:
  - Class Test (weighting - 40%)
  - Coursework: (weighting – 60%)
- Re-assessment: None

<tbody>
<tr>
<td>F20IF</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Pre-requisites:** F29SO – Software Engineering & F29PD – Professional Development or equivalent

**Aims:**
This course explores a range of issues concerning advanced contemporary methodological approaches to information systems development. The aim is to enable students to develop critical faculties and techniques in relation to the selection and application of these methodological approaches.

**Syllabus:**
There is a growing requirement in industry for engineers and scientists with good and appropriate analytical skills when considering the development and evolution of systems, in particular information systems. This module develops further the knowledge and skills students should have already gained in the Information Systems and Software Engineering modules in topics such as:

- General Systems Principles;
- Systems Classification and Taxonomy Models;
- Information Systems Life Cycle and Functions;
- Paradigmatic Approach to Methodology Classification;
- Framework for Analysis and Comparison of Methodologies (NIMSAD & Fitzgerald's);
- Process Improvement Models;

**Learning Outcomes: Subject Mastery**
*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*
This course develops further the knowledge and skills students should have already gained in the Information Systems and Software Engineering courses. It will enable students to:
- Determine alternative approaches to gathering requirements and systems development
- Compare methodologies for use in organisations using a standardised Framework
- Rationalise systems development to prepare a more relevant system
- Assimilate their knowledge and understanding of the ways in which Information Systems are developed, including a range of established techniques of enquiry or research methodologies

**Learning Outcomes: Personal Abilities**
*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*

- Critical reading and reviewing works in the field
- Evaluating Methods under an agreed Framework
- Structuring an argument (PDP)
- Use of VLE as a means of learning

**Assessment Methods**
Assessment:
Examination: (weighting – 60%)
Coursework: (weighting – 40%)

Re-assessment:
None

</tr>
</thead>
<tbody>
<tr>
<td>F20MC</td>
<td>Mobile Communications and Programming</td>
<td>M Abdelshafy</td>
</tr>
</tbody>
</table>

**Pre-requisites:** Knowledge of network communications and object oriented programming

**Aims:**
- To introduce students to the particular problems of building networks which include mobile computing devices and to explain how they may be overcome using current technology
- To introduce students to the issues surrounding ad hoc networking and give an understanding of how these can be addressed
- To introduce students to programmable mobile and handheld devices
- To develop students’ skills in developing applications for mobile and handheld devices

**Syllabus:**
- Fixed node IP routing - routing techniques for conventional wired networks
- Mobile IP routing - routing for wireless mobiles to IP
- Ad hoc networks and routing
- Security protocols - identification and authorisation, infra structure security
- Small device characteristics - screen size, memory, power consumption, input mechanisms
- Current devices - tablet PC, mobile phone, PDA
- Application development environments - Java APIs, C# and .NET

**Learning Outcomes: Subject Mastery**

*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*

- To understand and apply the principles of secure, effective communication over networks including mobile elements.
- To be able to explain the operation of current and proposed protocols for communication over networks which include mobile elements
- To understand the issues introduced by ad-hoc networking.
- To have knowledge of common ad-hoc routing protocols
- To explain evaluate current and proposed mobile devices
- To design applications for mobile devices including use of wireless communications where appropriate.
- To program such applications using current application development environments

**Learning Outcomes: Personal Abilities**

*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*

- To be able to select and apply suitable techniques of analysis in assessing the effectiveness of a technical solution
- To be able to critically review the issues of security and privacy relating to networking
- To be able to write good technical documents in support of problem solving within the domains of mobile networking and of mobile and handheld device solutions.

**Assessment Methods**

- Assessment: Examination: (weighting – 80%)
- Coursework: (weighting – 20%)
- Re-assessment: None

</table>
| Syllabus:           | ♦ The course addresses the challenges of engineering and modelling safe and secure software systems.  
♦ It covers a range of rigorous processes and formal methods that support the development of high integrity software systems.  
♦ From modelling and reasoning about designs through to code, students will experience a range of state-of-the-art static analysis tools and techniques.  
♦ While theory based, the course has a strong practical element, drawing upon industrial case study material where appropriate. |                               |
| Learning Outcomes:  |                                               |                               |
| Subject Mastery     | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
♦ Knowledge and understanding of a range of rigorous processes and formal methods that support the development of high integrity software systems.  
♦ Critical understanding of the relationship between code level annotations and high-level formal specifications.  
♦ Knowledge of the mechanisms that underlie advanced modelling and static analysis techniques.  
♦ To be able to demonstrate a critical understanding of the relationship between code level annotations and flow analysis techniques.  
♦ To be able to demonstrate a critical understanding of program proof and how it can be used to provide strong formal correctness guarantees. |                               |
| Personal Abilities  | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT  
♦ Conceptualize and define new abstract problems within the context of automated software development.  
♦ Make informed judgements in situations in the absence of complete or consistent data.  
♦ Exercise autonomy, initiative and creativity in the application of software engineering techniques.  
♦ Demonstrate critical reflection. (PDP)  
♦ Communicate with professional level peers, senior colleagues and specialists. (PDP) |                               |

<tr>
<td></td>
<td>- A detailed and critical knowledge of requirements gathering, design and evaluation techniques in interaction design.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- An awareness of current research and emerging issues in the field of interaction design.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- A range of specialised skills, and research methods involved in working with users.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Syllabus:</td>
<td>Current and emerging topics in Interaction Design including: user demographics, patterns in technology adoption, interaction design lifecycles, user interface design patterns, prototyping methods, a range of qualitative and quantitative data gathering and analysis techniques, accessibility, and a range of research case studies covering issues in the field</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Learning Outcomes: Subject Mastery</td>
<td>Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Students will develop skills in the following areas:</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Review, analyse, and evaluate previous research projects in the field of interaction design</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Propose solutions in response to analysis of users’ requirements.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Make informed judgements about appropriate methodologies for developing and evaluating technologies suitable for user demographics and background experience.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Learning Outcomes: Personal Abilities</td>
<td>Industrial, Commercial &amp; Professional Practice; Autonomy, Accountability &amp; Working with Others; Communication, Numeracy &amp; ICT</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Use discipline appropriate software for data analysis, prototyping and learning.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Present, analyse and interpret numerical and graphical data gathered as part of evaluation studies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Communicate effectively to knowledgeable audiences by preparing formal and informal presentations and written reports.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Exercise autonomy and initiative by planning and managing their own work; develop strategies for independently solving problems and taking the initiative.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Take responsibility for their own and other’s work by contributing effectively and conscientiously to the work of a group, actively maintaining good working relationships with group members, and leading the direction of the group where appropriate.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Reflect on roles and responsibilities by critically reflecting on their own and others’ roles and responsibilities.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Develop an awareness of professional and ethical issues including working with human subjects and wider issues relating to technology in society</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Assessment Methods</td>
<td>Assessment: Examination (weighting - 50%)</td>
<td></td>
<td></td>
</tr>

</tbody>
</table>

**Pre-requisites:** F29DC (Data Communication and Networking) or equivalent. Good understanding of fundamental security topics.

**Aims:**
- Improve students’ analysis skills and allow them to identify network security threats in a systematic way.
- Give practical experience of exploiting vulnerabilities in common computer system architectures.
- Impart a good understanding of common techniques to implement countermeasures.
- Provide the student with in-depth understanding of penetration testing concepts and methodologies.

**Syllabus:**
- Wireless Security: Wired Equivalent Privacy (WEP) vulnerabilities, Wireless Protected Access (WPA) and IEEE802.11i
- Penetration testing: penetration testing process: Reconnaissance, Scanning, Gaining access, Maintaining access, and Covering tracks.
- Digital Forensics: introduction, EnCase and open source tools.
- Privacy and P3P.

**Learning Outcomes: Subject Mastery**
*Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)*

At the end of this course, the students will be able to:
- Identify and explain vulnerabilities of network protocols vulnerabilities.
- Design countermeasures to protect a network from unauthorised network access.
- Identify threats and measures to protect against threats in wireless networks.
- Test and evaluate the security of an IT infrastructure.

**Learning Outcomes: Personal Abilities**
*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*

- Ability to appraise the security of an IT infrastructure.
- Showing teamwork skills and being an effective member of a penetration testing team.
- Develop a set of ethical best practices for a security career.
- Ability to make decisions regarding how to secure a system in absence of a complete picture of its configuration.

**Assessment Methods**
- Assessment: Examination (weighting - 60%)
- Coursework: (weighting – 40%)
- Re-assessment: None
<table>
<thead>
<tr>
<th>Course Code: F20BD</th>
<th>Course Title: Big Data Management</th>
<th>Course Co-ordinator: H Zantout</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-requisites:</td>
<td>Academic knowledge of fundamentals of databases and logic.</td>
<td></td>
</tr>
</tbody>
</table>
| Aims:              | ♦ Review principle abstractions, methods and techniques for the management of large and complex data sets (“Big Data”).  
♦ Develop an understanding of the foundations and tools of the Semantic Web.  
♦ Enable students to appreciate critically a range of data integration solutions. |
| Syllabus:          | Complex data sets:  
RDF, triple stores, SPARQL, Big Data vs Smart Data vs Broad Data, NoSQL, indexing data.  
Semantic Web Foundations:  
RDFS, OWL, Ontologies, Reasoning, Protégé.  
Data Integration:  
Linked Data, Mash-ups, Ontology mapping, Data Provenance. |
| Learning Outcomes: | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
♦ Knowledge and understanding of a range of data representation and data management techniques for big data sets.  
♦ Critical understanding of the role of semantic web technologies in the context of big data management.  
♦ Knowledge of the mechanisms that underlie data integration techniques.  
♦ To be able to demonstrate a critical understanding of appropriateness and effectiveness of different techniques |
| Learning Outcomes: | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT  
♦ Conceptualize and define new abstract problems within the context of complex data sets.  
♦ Make informed judgements about the applicability of semantic web solutions to big data questions.  
♦ Exercise autonomy, initiative and creativity in the application of data integration techniques.  
♦ Demonstrate critical reflection. (PDP)  
♦ Communicate with professional level peers, senior colleagues and specialists. (PDP) |
| Assessment Methods | Assessment: Examination (weighting - 70%)  
Coursework: (weighting – 30%)

<td><strong>Pre-requisites:</strong></td>
<td>Fundamentals of logic, grasp of computational thinking</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Aims:</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>◆ To provide an overview of advanced topics in Digital and Knowledge Economy, including current developments and future trends in developed economies resulting from deploying new technologies and utilising emerging knowledge.</td>
<td></td>
</tr>
<tr>
<td>◆ To discuss e-Business, as a new breed of modern business model that leverages technical advancements to create economic growth.</td>
<td></td>
</tr>
<tr>
<td>◆ To provide a high level description of business and technological issues related to Digital and Knowledge Economy.</td>
<td></td>
</tr>
<tr>
<td>◆ To introduce technologies and methodologies so as to provide a deep understanding of the Digital and Knowledge Economy, including business, organisational, knowledge and technology based issues.</td>
<td></td>
</tr>
<tr>
<td>◆ To impart rigorous technical modelling and analytical methodologies for working with complex problems in this area.</td>
<td></td>
</tr>
<tr>
<td>◆ To facilitate the dialogue between business and computing personnel, and translate business requirements to computing ones and vice versa.</td>
<td></td>
</tr>
<tr>
<td>◆ To impart deep understanding of the motivation and rationale behind the conversations between business and IT, as well as other relevant technologies and future trends - so that students can recommend them and/or participate in the decision making process for future planning.</td>
<td></td>
</tr>
</tbody>
</table>

</table>

| **Learning Outcomes:** Subject Mastery | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning) | |
| --- | --- | |
| ◆ Understanding of key issues in Digital and Knowledge Economy. | |
| ◆ Understanding of ontologies, conceptual and knowledge modelling technologies, in terms of design, critical evaluation and suitable practical uses. | |
| ◆ Understanding of issues in intelligent systems, supply chain management and business intelligence and the roles technologies may play. | |
| Learning Outcomes: Personal Abilities | Understanding of issues and the motivation and rationale of business and technical problems in Digital and Knowledge Economy.  
| | Ability to select and construct conceptual models, including ontologies, and can create appropriate evaluation criteria to assess them.  
| | Ability to take self-initiatives to review relevant literature independently in Digital and Knowledge Economy.  

*Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT*

- Analytical skills in conceptual modelling methods, including ontologies, process and knowledge modelling, for business problems.
- Ability to make well-informed evidence-based arguments towards supporting or rejecting technologies to solve business problems.
- Ability to deal with complex issues and make informed judgements, e.g. about ontologies, knowledge modelling, intelligent and business systems in the absence of complete or consistent data.
- Exercise autonomy and initiative in addressing digital and knowledge economy challenges.
- Demonstrate reflection on digital and knowledge economy.
- Ability to judge technology hypes and develop personal opinions on future trends.

<tbody>
<tr>
<td><strong>Pre-requisites:</strong></td>
<td>C++ programming skills</td>
<td></td>
</tr>
<tr>
<td><strong>Aims:</strong></td>
<td>To develop programming skills and techniques specific to the area of 2D and 3D computer games</td>
<td></td>
</tr>
</tbody>
</table>
| **Syllabus:** | - Computer Games Design Concepts (Genres, Narrative and Fun).  
  - Elements of Game Design (Formal, Dramatic and System Dynamics).  
  - Character and World Design.  
  - Design Programming Patterns (Input, loops, structures, objects and optimisation).  
  - Games Creation Concepts (Conceptualisation, Prototyping, Playtesting).  
  - Game-state, simulator, renderer, (hierarchical) controllers.  
  - Tools, environments and coding practices—e.g. graphics, C++ and engines.  
  - 2D and 3D game programming techniques.  
  - Physically-based modelling, particle systems, flocking.  
  - Obstacle avoidance and path planning.  
  - Group movement.  
  - Learning and adaptation in games.  
  - Action and behaviour selection.  
  - Procedural Generation.  
  - Course summary and review. |
| **Learning Outcomes: Subject Mastery** | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
- Understanding of game theory and computer game history, genres and impact  
- Understanding of game design concepts, elements and characters.  
- Understanding of available tools and their application  
- Knowledge of algorithms for path planning and navigation  
- Knowledge of physically-based modelling in games and selection of techniques  
- Knowledge of AI techniques in games and selection of techniques  
- Ability to understand, design and implement a small-scale game using 2D and 3D tools  
- Practical skills in graphics and AI programming in the computer games context |
| **Learning Outcomes: Personal Abilities** | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT  
- Representation of, planning for, and solution of problems.  
- Ability to plan, design, prototype and communicate a game.  
- Ability to think and plan in three dimensions.  
- Team working skills. |
| **Assessment Methods** | Assessment: Examination (weighting - 50%)  
Coursework: (weighting – 50%) | Re-assessment: None |
<table>
<thead>
<tr>
<th>Course Code: F20NA</th>
<th>Course Title: Network Applications</th>
<th>Course Co-ordinator: T Shaikh</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pre-requisites:</strong></td>
<td>Either F28WP Web Programming and F27SB Software Development 2 or reasonable software development skills in Java and basic knowledge of data communications and the web.</td>
<td></td>
</tr>
</tbody>
</table>
| **Aims:** | ♦ To impart knowledge and understanding of the theories, principles and protocols underlying the primary network applications on the Internet.  
♦ To develop the ability to appreciate critically the range of network application technologies and standards.  
♦ To give students significant development skills in a range of the principal network technologies, to grasp the main design and practical issues faced in their application, and confer the ability to select and apply relevant techniques for a given network application development problem.  
♦ To have students creatively develop in teams a substantial network application involving web and application server technologies to an original design of their own. |
| **Syllabus:** | Network services – service styles and models, Internet, DNS, sockets, implementing services; e-mail - MIME, SMTP, POP, IMAP; web protocols - URIs, HTTP versions and characteristics; web content - HTML, XML, XHTML, HTML 5, forms, tables, embedded objects; CSS style properties; JavaScript – object prototypes, standalone and web client programming; DOM versions, CSS 3, DHTML, AngularJS; web server programming in Java and JavaScript - REST web services, CGI, servlets, JSP, Node.js, web frameworks; asynchronous use of HTTP - AJAX, JSON, JSONP; textual conferencing - IM, IRC, web chat via short and long polling, HTTP streaming, applet sockets and web sockets; web sessions – URL rewriting, web storage, cookies; HTTP authentication. |
| **Learning Outcomes: Subject Mastery** | Understanding, Knowledge and Cognitive Skills; Scholarship, Enquiry and Research (Research-Informed Learning)  
♦ Extensive, detailed and critical knowledge and understanding of the theories, techniques and principles underlying the design of network applications and the range of their application.  
♦ Theoretical and practical knowledge of the major network application types including email, web and chat applications and services.  
♦ Critical awareness of protocols and standards underlying key network applications especially the web and of enabling technologies for network applications such as sockets, DNS, XML.  
♦ Ability to design and develop useful network applications including web, email and chat software using apt technologies and languages: HTML, XML, JavaScript, CSS, Java applets, CGI, servlets, active web server pages, REST web services etc. to professional standards. |
| **Learning Outcomes: Personal Abilities** | Industrial, Commercial & Professional Practice; Autonomy, Accountability & Working with Others; Communication, Numeracy & ICT  
♦ Skills in selecting, applying and evaluating apt technologies in a professional way given a problem requiring network interaction.  
♦ Ability to build on initial skills and knowledge by independent research using online resources.  
♦ Showing initiative, creativity and team working skills in shared network application development. |
| **Assessment Methods** | Assessment: Examination (weighting - 60%)  
Coursework: (weighting – 40%)  
Re-assessment: None |
PART B: UNIVERSITY INFORMATION

The Academic Registry is responsible for producing Part B of the handbook to provide information and assistance on University policies and support services.

Please note that the following sections are standard sources of information provided to all students. However, certain aspects are programme-specific and you should refer to Part A where directed. Students are advised that the University will make changes to study programmes and progression requirements from time to time in accordance with strategic developments and it is therefore important to ensure that you check the most recent version of the handbook for up-to-date information.

B1. Our Values

At Heriot-Watt, we have an established set of values that help up to nurture innovation and leadership and show our commitment to continuous development in all our activities. They are:

- Value and Respecting Everyone
- Pursuing Excellence
- Pride and Belonging
- Shaping the Future
- Outward Looking

Find out more about the Heriot-Watt values and what they mean to us.

B2. Student Learning Code of Practice

The Student Learning Code of Practice outlines information about the University, its culture, policies, regulations and the expectation for students and staff. Please familiarise yourself with the relevant Code that is located within the Learning and Teaching Policy Bank.

B3. University Policies and Support Services

Heriot-Watt University has a detailed set of rules that governs the operation and management of University business. These are referred to as Ordinances and these Ordinances are set by the Court, which is the governing body of the University. The Ordinances provide a regulatory framework for corporate governance. The University Ordinances are supported by University Regulations which provide a regulatory framework for the governance of academic-related matters which staff and student must adhere to for all academic matters. Wherever practicable, University policy is designed to include all members of the University's community, both within and outwith the main campus environments.

Read more about the University Policies, Ordinances and Regulations.

As part of your University enrolment, you signed the Student Declaration and agreed to abide by the regulations of the University and conform to its policies, procedures, ordinances and regulations that underpin the Ordinances and Regulations. During your time at Heriot-Watt, the following policies, procedures, reference information and support services may be relevant and useful guidance for you.
B4. Your Student Portal

The Student Portal brings together your services and relevant information in one place. Below is a summary of the services available to you via the portal:

- **Office 365 suite**: through single sign-on, all of your Office 365 services will be accessible through the Portal.
- **Library**: whether you want to search for books or view your loans & reservations, the Portal allows you to do this on your phone or desktop.
- **Vision**: your Portal will present you with announcements and tasks related to this course.
- **Student Information**: all university-level regulations and policies relating to your studies can be found on the Portal.
- **Heriot-Watt PGR News**: the Portal enables the University to promote events and experiences which will help you develop your skills.
- **Personalised**: You can hide, add and move tiles on your dashboard.

You can access your student portal [here](#).

B5. Quick Finder Guide to Academic and Support Services

The following provides an A-Z guide on the academic and support services available to you during your studies.

By clicking on the subject heading you will link to the relevant information in the student portal/website. Please ensure that you check the portal/web at the regular times throughout the year for the most up-to-date information:
