All students registered for this programme are expected to have read and to be familiar with the contents of this Handbook.

Disclaimer: Every effort has been made to ensure the contents of this booklet are accurate at the time of printing. Unforeseen circumstances, however, may necessitate changes to the procedures, curricula and syllabuses described.

Heriot-Watt University is a Scottish charity registered under charity number SC000278

PART A: School Information

1 Introduction

This handbook is a guide to what is expected of you on this MSc in Financial Mathematics programme, and the academic and pastoral support available to you. Please read it carefully. It will help you to make the most of your time on the Programme.

Useful information can also be found in the School of MACS new website here: https://www.macs.hw.ac.uk/students/

Students can also get advice on a range of Finance, Hospitality Services and Academic Registry issues from the Student Service Centre https://www.hw.ac.uk/services/student-service-centre.htm which is situated in the Hugh Nisbet Building on Riccarton Campus (email: studentcentre@hw.ac.uk).

2 Programme aims

The aim of the Programme is to train individuals with a strong mathematical background in the theory and practice of financial mathematics. It should enable them to operate immediately and effectively as members of the financial community. In particular the Programme will provide:

- a modern introduction to financial mathematics which will equip graduates with the necessary skills to commence work in any field in which finance is central, such as investment banking or asset management;
- the ability to understand the assumptions in the models used in pricing and hedging financial instruments, where they break down, and the mathematical sophistication required to follow the research literature.

Graduate Attributes

As a student of Heriot-Watt University, you are part of our global community. You will meet new people, discover new interests, develop your life skills and enhance your employability and career prospects.

The University will provide you with opportunities to develop skills, qualities and academic abilities during your time as a Heriot-Watt student. These are known as the Four Heriot-Watt Graduate Attributes:

- Specialist
- Creative
- Global
- Professional

Further information can be found at: https://www.hw.ac.uk/services/academic-registry/quality/learning-teaching/graduate-attributes.htm
Enrolment

All student enrolment is completed online. You are responsible for ensuring your enrolment details are correct, and that you have enrolled for all courses that you wish to take. Information to assist with course selection will be provided at the Pre-Enrolment meeting. If you have any questions about enrolment you should speak to staff in the School Office. Students are advised to enrol for ALL courses the first instance. This can always be changed at a later date.

You must enrol for either the PG Diploma in Actuarial Science or the MSc in Actuarial Science. If you change your mind and wish to change programme you may only do so before 30 September by advising the Programme Administrator in writing. International students should be aware that any programme changes will be notified to the UK Border Agency and this may have implications for your student visas.

No refunds of programme fees will be provided to students who leave the University without completing the programme for which they are registered for any reason (i.e. regardless of whether this departure is voluntary or because students have failed to qualify for the desired award).

2.2 Timetable

Timetables can be found at: https://www.hw.ac.uk/students/studies/timetables.htm. Occasionally it is necessary to make adjustments to the timetable, such as rescheduling a class – all changes will be notified on the class VISION pages or by email.

Classes are timetabled to start and finish at 15 minutes past the hour. The standard Heriot-Watt practice is that classes start at 20 minutes past the hour and finish at 10 minutes past. Please be courteous to staff and fellow students by ensuring you arrive on time to all your classes.

2.3 Attendance

In order to achieve course and programme learning outcomes, students are expected to attend all scheduled course learning sessions (e.g. timetabled lectures, tutorials, lab sessions, etc). Should you have to missed a timetabled session due to ill health or other legitimate reasons, you should submit a self-certification or medical certification or an application for consideration of Mitigating Circumstances. https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm

Students who fail to satisfy course attendance requirements may, after due warning, be disallowed from presenting themselves for examination in the course. https://www.hw.ac.uk/students/studies/record/attendance.htm

Coursework must be handed in by the stipulated dates, and students are required to see their personal mentors at agreed times. Students who fail to submit compulsory coursework may also be disallowed from presenting themselves for examination in the relevant courses.

All lectures and tutorials are compulsory and registers of attendance may be taken.
If you are absent from class due to illness for four days or less, you should complete a self-certification form, obtainable from the School Office (EM 1.25), and return it to the School office within a week of your return. If you are absent for more than four days, you must supply a medical certificate to the School Office within a week of your return.

Students on a Tier 4 Student Visa are required to attend the signing-in sessions in October, November, February, March, June, July and August. You must also attend the re-enrolment session in January. It is your responsibility to make sure that you attend these events. Failure to attend will mean that you will be reported to UKVI and your right to remain in the UK maybe removed.

2.4. Computer Facilities

You will enrol as a user of the University computer network. This will give you an email account, and access to word-processing facilities and various packages which will be needed for some courses. Once you have completed on-line enrolment you will print out a letter which confirms your enrolment. Along with this letter are details of your University user name and password. Your user name will also be your email address eg user name ab111 will have the email address ab111@hw.ac.uk

You will be credited with a printing quota for use over the year. While an additional allocation may be made in the summer for those proceeding to the MSc, you are advised to use your quota sparingly.

Abuse of the computing facilities will result, at the very minimum, in a ban from the facility.

Information about our Information Services can be found at: http://www.hw.ac.uk/is/guides/getting-started.htm

3 Administration

The administration for the Programme is handled by the Department of Actuarial Mathematics and Statistics at Heriot-Watt University, which is part of the School of Mathematical and Computer Sciences. The other entities involved with the Programme are the School of Mathematics at the University of Edinburgh and the School of Management and Languages at Heriot-Watt University. Each department has a Programme Coordinator responsible for the courses run by that department.

3.1 Programme Director

Dr Matthias Fahrenwaldt
Department of Actuarial Mathematics and Statistics
School of Mathematical and Computer Sciences
Heriot-Watt University
Room F. 13, Colin Maclaurin Building
Edinburgh EH14 4AS
Tel: 0131 451 3664
Email: m.fahrenwaldt@hw.ac.uk

Matthias acts as the point of contact for students who require advice or assistance for both academic and non-academic matters.
3.2 Programme Coordinators

Professor Istvan Gyongi  
School of Mathematics  
The University of Edinburgh  
Room S612, James Clerk Maxwell Building, The King’s Buildings  
Edinburgh EH3 9BW  
Tel: 0131 650 5945  
Email: I.Gyongy@ed.ac.uk  

Istvan deals with any queries about courses taught by the School of Mathematics at the University of Edinburgh.

Dr Bing Xu  
School of Management and Languages  
Heriot-Watt University  
Room 2.23, Henry Prais Building,  
Tel: 0131 451 8072  
Email: B.Xu@hw.ac.uk  

Bing coordinates those parts of the course taught by the School of Management and Languages, Heriot-Watt University.

3.3 Programme Administrators

Students should contact staff in the School Office (EM1.25) in the first instance for any enquiries in relation to the programme. The School Office is open weekdays from 10.00 to 16.00. The School Office can also be contacted on: macs-schooloffice@hw.ac.uk; tel 0131 451 3432

Heriot-Watt University:  
Ms Rodi Amiridou  
School of Mathematical and Computer Sciences  
Heriot-Watt University  
Room 1.24, Earl Mountbatten Building  
Edinburgh EH14 4AS  
Tel: 0131 451 8314  
Email: R.Amiridou@hw.ac.uk

University of Edinburgh:  
Mr Luke Caudrey  
Deputy Administrator (Teaching)  
Mathematics Teaching Organisation  
The University of Edinburgh  
Email: Luke.Caudrey@ed.ac.uk

3.4 Wider Support

For more general problems, your personal tutor is available to offer support, advice, and help if you run into difficulties, be they personal or academic. Tutors will offer assistance as far as they can, and can put you in touch with appropriate University support services. The University offers a wide
range of support services for students and you are encouraged to make use of these to make your

time at Heriot-Watt as enjoyable and trouble-free as possible.

**The Chaplaincy** welcomes all students from any background and is available for prayer, counselling
and support and social events. See: www.hw.ac.uk/chaplaincy; email: chaplaincy@hw.ac.uk

**Student Support and Accommodation** provides student counselling and welfare support. See:
https://www.hw.ac.uk/students/health-wellbeing/edinburgh/faith/chaplaincy.htm

**University Health Service** is available to all students. You can make an appointment to see a doctor
by telephoning 451 3010 or dentist by telephoning 451 3080. See: http://www.hw.ac.uk/stu-
dents/health-wellbeing.htm

**International Student Advisors** are available to provide advice and support with visas, studying in
Scotland and any other general support and advice to international students. See:
https://www.hw.ac.uk/students/international/uk.htm

**Heriot-Watt Students Union** see: http://www.hwunion.com/

**Careers Advisory Service** has in-house advisers with considerable expertise in the actuarial and fi-
nancial job market and can assist with job applications and preparing for interviews. See:
https://www.hw.ac.uk/study/why/careers-advisory-service.htm
or contact Alan Smith (telephone 451 3390 or email A.Smith_3@hw.ac.uk).

**Academic Skills Service** provides coaching and counselling to assist students to work smarter. See:
https://www.hw.ac.uk/services/is/skills-development/study-support.htm

Also see the A-Z guide for students http://www.hw.ac.uk/students/doc/a-z-students-ed-sbc.pdf

### 3.5 Mitigating Circumstances

If you experience any mitigating circumstances which affect your ability to complete your assess-
ments you must notify us as soon as possible.

You should read the University’s Policy on Mitigating Circumstances in Relation to Assessment at:
https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm and then
complete the application form. This form along with any relevant evidence (e.g. medical certifi-
cates) should be submitted to the School Office. Evidence submitted after your results have been
published cannot be taken into account.

If you think you qualify as a Special Needs student (if for example you are registered with a disabil-
ity) please bring this to the attention of Mrs Gunn as soon as possible.

It is very important that if you have a problem you seek help as soon as possible, and notify us of
the situation. The Examiners will always take such circumstances into account where appropriate,
but the later the notification, the less scope there is to do so. Notification of mitigating circum-
cstances **must** be given before the Exam Board meeting is held. Late notification will normally mean
that no consideration can be taken of the circumstances.
Any information which you provide to us will be used solely by the Board of Examiners to determine how best to help you, given the circumstances. We will not share the information with other students or services of the University without your consent.

3.6 Temporary Suspension of Studies

If students are unable to study for a considerable period (i.e. more than one diet) they should inform their personal tutor, so that such periods of non-study can be taken into consideration when reviewing the students continued registration on the Programme.

If students continue to be unable to study for a specific known period (for example, more than one year) due to other external factors (for example, maternity), then they should seek to temporarily suspend their studies.

If you intend to apply for a suspension of studies, please contact your School/Institute Office. You can find useful information here: [https://www.hw.ac.uk/students/studies/leaving/temporary-suspension-studies.htm](https://www.hw.ac.uk/students/studies/leaving/temporary-suspension-studies.htm)

3.7 Withdrawing from Study

Students may find that the Programme is not suitable for them and they may decide to withdraw from it. Students should think very carefully before they do withdraw. If they do so, it may well be that sometime later they decide that they would like to continue with their studies.

Before making a final decision about withdrawing, students should discuss their situation with their Personal Tutor.

The University has a “Thinking of Leaving” Service which you can use. Please see more information here: [https://www.hw.ac.uk/students/studies/leaving.htm](https://www.hw.ac.uk/students/studies/leaving.htm) where you can find a range of information and advice that can help you make the final decision.

3.8 Personal Tutors

All Heriot-Watt students are allocated a personal tutor. [https://www.hw.ac.uk/students/studies/personal-tutors.htm](https://www.hw.ac.uk/students/studies/personal-tutors.htm). If you have any academic, personal or financial problems during the year your personal tutor will be very willing to advise or help you within their competence. If they cannot help you they will advise who you should speak to for more expert advice.

You are required to meet with your mentor at least once each semester. For international students this counts as a required contact point for attendance monitoring purposes.

3.9 Representation and feedback

Great emphasis is put on student feedback to improve the student experience, particularly with respect to the delivery of courses. Feedback is a two-way process. Feedback is provided to students in a variety of ways in order to help you to reflect on and to evaluate your progress and to assist you to take steps to improve before the next relevant assessment. For most courses, students can expect feedback on assessed coursework within three teaching weeks of the coursework due date.
All students on the MSc should feel free to discuss aspects of the running of the Programme directly with the Programme Director. However, issues which are relevant to the whole of the class should normally be raised with the Programme Director through a student representative sitting on the AMS Department’s Postgraduate Staff Student Liaison Committee.

At least one Class Representative will be elected at the start of the year. Class Reps will engage with the Programme Director to monitor and review all aspects of the Programme and act as the main communication channel between students on the Programme and the Programme Director. If an issue emerges with the Programme, the Programme Director will ask the Class Reps to discuss the issue with the class and report back.

Feedback is sought from students also via various surveys so that the School can continue to enhance the student learning experience. Your feedback is valued by the School, so please be sure to provide feedback whenever it is sought.

4 General Information

4.1 Teaching Accommodation and Staff Accommodation

Classes may be held in any teaching rooms on campus. Students on other postgraduate programmes will join the class for certain lectures.

The academic staff of the Department of Actuarial Mathematics and Statistics all have their offices in the Colin Maclaurin (CM) building. Administrative staff and the MACS School Office (EM 1.25) are nearby in that section of the Earl Mountbatten building close to the CM building.

4.2 Contacting You

The Programme Director, Programme Administrator, and lecturers will regularly communicate with you by email. All emails will be sent to your Heriot-Watt email address (e.g. abc123@hw.ac.uk) and NOT to any personal email address you may have.

It is your responsibility to find out what arrangements have been made and what information has been sent to you.

You are expected to check your email in-box regularly.

You should also check the VISION regularly for announcements and updates.

4.3 Student Mail

Mail arriving for all students in the School is put in pigeon holes in the School Office.

4.4 Finance

Students are reminded that tuition fees are due prior to or at enrolment and are payable immediately. Anyone who is experiencing difficulty in meeting their repayments should contact the Stu-
dent Service Centre immediately. The University has a strict policy regarding the payment of in-
voices and students who fail to meet this will have their student privileges withdrawn and may in 
some cases be subject to legal proceedings.

If you are experiencing difficulties in meeting your payments it is essential you contact the Student 
Service Centre at the first available opportunity. You may also wish to seek advice from your mentor 
or from staff in the School Office who can liaise with Finance Office on your behalf.

If you are paying by recurring card plan the payments will be taken in six, equal monthly instalments 
on specific dates. This option is not flexible and one missed payment will result in the agreement 
being revoked and the remaining balance will be due for immediate payment.

No student with outstanding debt will be permitted to graduate from the University, and in some 
cases students with debt may be prevented from continuing to the MSc project work stage of the 
programme.

5 Teaching and learning approach

The study programme for the MSc in Financial Mathematics consists of:

- 8 compulsory courses including 2 special topics courses,
- 9 optional courses,
- 1 project/dissertation.

The Programme has been designed to introduce students to most areas of mathematics required 
in the financial industry. In order to ensure a complete coverage of the mathematics and the finan-
cial context there are 15 taught courses. There are also a number of special topics, of which the 
student must take 4 (two in each special topics course), which give the opportunity for more spe-
cialised training in specific areas. These will be guided reading, assessed by a combination of presen-
tations and written reports. The final component is a project/dissertation, which will give the op-
portunity to work on a problem of relevance to a financial institution.

5.1 Core courses

The core courses deal with the technical knowledge and practical skills that are essential for anyone 
who is to graduate with an MSc in Financial Mathematics. There are eight core courses:

Semester 1

- Stochastic Analysis in Finance (20 credits) F71SF
- Financial Markets (15 credits) C31FM
- Discrete-Time Finance (10 credits) F71DT
- Derivatives Markets (7.5 credits) F71DM
- Special Topics 1 (7.5 credits) F71TA

Semester 2
5.2 Optional courses

The optional courses allow each student to specialise in a range of skills that suits his/her own career development. Your personal tutor will discuss with you the appropriate choice of optional courses based on your background and progress on the Programme to date. A student is allowed to change courses, at any time up to the end of week three of the Semester, providing that the student has not taken any assessment on that course.

The list of optional courses is given below:

Semester 1

- Statistical Methods (15 credits) F71SM
- Statistical Inference (7.5 credits) F71ST

(Statistical Inference and Statistical Methods cannot be taken both as options.)

Semester 2

- Portfolio Theory (15 credits) F71PT
- Stochastic Control and Dynamic Asset Allocation (10 credits) F71SC
- Optimisation Methods in Finance (10 credits) F71OM
- Simulation (10 credits) F70SB
- Financial Econometrics (7.5 credits) C21FE
- Numerical Techniques for PDEs (7.5 credits) F71NT
- Time Series Analysis (7.5 credits) F71TS

The number of options that students must take depends upon the number of credits that each course carries. The total number of credits for options courses must be between 22.5 and 30. This range ensures that students have full flexibility in their choice of options. The usual procedure is that students create a priority list and then take the smallest number of preferred courses that exceed the minimum of 22.5 credit credits.

Brief descriptions of the optional courses and links to the Degree Regulations and Programmes of Study can be found in Section 8.2.

5.3 Dissertation

During the period from June to August, candidates for the MSc work on a project on an approved topic and write a dissertation based on this work. The project gives the student the opportunity to apply skills developed earlier in the Programme to real problems in Mathematical Finance.
Projects are either done jointly with a sponsoring organisation or as an academic project aimed at developing practical skills relevant for the financial industry. Academic projects are organised as group projects, i.e. groups of about 4-5 students work on different variants of the same core topic with the same supervisor.

Students are strongly encouraged to seek the opportunity to do their project in collaboration with an outside partner such as a bank or other financial institution. A wide variety of organisations provide work based projects through the Scottish Financial Risk Academy (SFRA). More detailed information will be provided in Semester 2. Here is an exemplary and non-exhaustive list of different types of dissertations:

- **A subject review** surveys a chosen area, summarising the research literature and providing an overview of its development, importance, methodology and outstanding problems.
- **A theoretical essay** describes, in considerable depth, some piece of mathematical theory relevant to finance. Papers in research journals are often very terse and assume a lot of prior knowledge on the part of the reader; an acceptable project could be to explain a recent paper, making its results more accessible and putting them in context.
- **A numerical project** would describe and implement one or more numerical methods for pricing, hedging or reserving for derivatives or portfolios, and perhaps aim to measure how well it performed using real or simulated data.
- **A data-based project** would analyse market data, fitting them to suitable models and drawing conclusions.
- **A software project** could aim to develop software for specific financial problems, perhaps as part of a placement with a financial institution.

### 5.4 Attendance

In order to achieve course and programme learning outcomes, students are expected to attend all scheduled course learning sessions (e.g. timetabled lectures, tutorials, lab sessions, etc). Should you have missed a timetabled session due to ill health or other legitimate reasons, you should submit a self-certification or medical certification or an application for consideration of Mitigating Circumstances [https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm](https://www.hw.ac.uk/students/studies/examinations/mitigating-circumstances.htm).

Students who fail to satisfy course attendance requirements may, after due warning, be disallowed from presenting themselves for examination in the course.

During the dissertation period students will have meetings with their supervisor. These meetings are compulsory. Unless granted a leave of absence, students are expected to stay in Edinburgh during the dissertation period.

Students on a Tier 4 Student Visa must attend the signing-in sessions in October, November, February, March, June, July and August. They must also attend the re-enrolment session in January. It is their responsibility to make sure that they attend these events. Failure to attend will result in a report to UKVI and the right to remain in the UK may be removed.
5.5 Combining work and study

It should be stressed that the Programme is full-time. You should expect to spend 40 hours per week attending classes, working on the delivered material and preparing assignments for submission. Unless you manage your time well, there will be weeks (particularly towards the end of Semester 2) when you will have to work significantly more than 40 hours. As a consequence, it is recommended that students do not take any employment.

Full time students shall not work more than 16 hours per week during term or during the summer months when the MSc dissertation is prepared. Students can take a part-time job only under the condition that such an activity will not adversely affect their performance on the MSc. Any part-time job which would exceed 16 hours per week should be discussed with the Programme Director.

5.6 Coursework, cover sheets and group assignments

The coursework requirements—case studies, essays, and other projects—vary between courses, as does the balance of the methods of assessment. The weighting of coursework and examinations for individual courses is given in the information for each course.

1. All coursework for courses delivered by the School of Mathematics at the University of Edinburgh must be submitted with a completed cover sheet, stapled in the top left corner, and handed to the Programme Secretary, JCMB Room 5211. Completed work must not be handed directly to any other member of staff or submitted by any other means. Cover sheets are available in JCMB 5211 (and on-line) and have a number of functions.
   a. They provide fields for the student’s name and matriculation number
   b. They contain an “own work declaration” relevant in cases of suspected plagiarism
   c. They allow comments on the coursework to be communicated to the lecturer
   d. They enable the coursework mark and feedback to be returned to the student

   Until a completed cover sheet has been provided, the work will not be considered to have been submitted.

2. For the School of Mathematical and Computer Sciences courses at Heriot-Watt University, coursework should be posted in the AMS coursework box situated outside the student office on the first floor of the Earl Mountbatten Building, EM 1.25. A completed cover sheet, available from perspex holders above the coursework box, should be stapled to the top left hand corner.

3. Coursework for courses delivered by the School of Management and Languages at Heriot-Watt University should be submitted to the School Office on the first floor of the Mary Burton Building, MB 1.23. A completed cover sheet, available from MB 1.23, must be stapled to the top left hand corner.

All students must adhere to deadlines for the submission of work. Work handed in late will incur a penalty. The penalty for late submission is a reduction of the mark by 5% of the maximum obtainable mark per calendar day (e.g. a mark of 65% on the common marking scale would be reduced to 60% up to 24 hours later). This applies for up to five calendar days (or to the time when feedback is given, if this is sooner), after which a mark of zero will be given. Note that the reference to “calendar
days” includes weekends and public holidays. Students may not, for example, submit work on a Monday morning for a Friday deadline in the expectation that no late penalty will be applied. If there is likely to be a delay due to illness or other crisis, the Programme Director must be informed in writing so that an extension may be considered.

5.7 Plagiarism

The University has a strict policy on Plagiarism – passing off as one’s own the ideas or writing of another. All students should be familiar with the University’s policy on plagiarism: https://www.hw.ac.uk/students/studies/examinations/plagiarism.htm

Plagiarism undermines every academic principle. Plagiarism is cheating and the Department, the School, and the University treat it very seriously indeed. This is relevant for all students and has implications for course work, exams and the writing of MSc dissertations. The sanctions for plagiarism range from the discounting of the plagiarised work, the course or dissertation completely, withholding of the degree or Diploma concerned, or ultimately to expulsion from the University. Anyone indulging in plagiarism of any kind can expect no sympathy or understanding from the University. Typically plagiarised work is discounted and will normally result in the student failing the relevant course.

We will automatically assess work which we feel is plagiarised, the system is extremely powerful in employing the Internet to identify source documents. Copying text verbatim from any electronic source (or book or journal article that is available electronically) without attribution will be identified as plagiarism.

If you have the slightest doubt about any aspect of this matter and of how your own work relates to it, you must discuss it with the Programme Director before submitting any work.

5.8 Disability and Special Needs

Some students on the MSc may have a form of disability or have special needs. Examples include students with hearing, eyesight problems or physical disabilities. We are very happy to make special arrangements to help you as much as we can to make your year here a successful one.

The University has a special needs adviser. If you do think there is something that we can help with then you should first make contact with the Special Needs adviser (http://www.hw.ac.uk/students/health-wellbeing/disability.htm).

The special needs adviser is also a useful person to contact during the year for some problems that might arise during the year, such as if you break a bone.

5.9 VISION

Each course based at Heriot-Watt University will have on-line material available at the University's Virtual Learning Environment (VISION) which can be found at: https://vision.hw.ac.uk. You will have access to information for all the courses for which you are enrolled.
6 Dissertation

6.1 General Information

The dissertation gives students the opportunity to make use of the knowledge and skills developed on the programme, frequently by working on a real mathematical finance problem within an external organisation, although dissertation projects may also be desk/library based.

Prior to the final assessment of the taught component of the MSc programme, all students are considered as MSc candidates. Following the Board of Examiners meeting in late May/early June, students who complete the taught component at MSc level proceed to the dissertation stage of the MSc programme. The award of the MSc degree thereafter depends solely on the achievement of a dissertation mark of at least 50%.

It is the responsibility of each MSc candidate to prepare a dissertation on a subject chosen by agreement with a member of staff who will act as an Academic Supervisor. Normally, the projects are organised as group projects, i.e. groups of about 4-5 students work on different variants of the same core topic with the same supervisor. Dissertation topics will be agreed by mid-May or earlier. Detailed work will be carried out during the months of June, July and August, with sufficient time being allocated to writing the dissertation. In some cases the research for the dissertation will involve working with an outside organisation for at least part of the summer months.

Full-time postgraduate students are required to be in Edinburgh for the duration of the Programme, unless specifically granted a leave of absence. We will not allow the student to submit a dissertation early in order to return home prior to the end of the Programme. Completing a dissertation in less than the time available is not recommended, as early completion may adversely affect the standard of work and presentation.

If commercial confidentiality requires that a dissertation be treated as confidential, this can be arranged by informing the MACS School Office at the time of submission. Confidential dissertations will be read by the Academic Supervisor and examiners, and will not be available for reference.

You are strongly advised to keep a back-up draft of your dissertation and not to use a USB stick for this purpose since they are easily lost or damaged. No compensation or extension will be given for work or data lost by students.

6.2 Role of the Academic Supervisor

The Academic Supervisor will give advice on the subject area, relevant literature, presentation format, methodology, structure of the dissertation, and scheduling of the work to be done. The final responsibility for the dissertation always lies with the student. Supervisors are not expected to read and amend chapters, but they may require periodic progress reports and sample chapters. The responsibility for the quality and content of a dissertation lies with the author of the dissertation.

Academic staff acting as Academic Supervisors cannot be expected to be available at all times, especially during the summer period, although staff will provide back-up facilities during their absence. Meetings should be arranged between Academic Supervisors and students at regular intervals, as appropriate. These meetings are primarily the initiative of the student. The frequency of
contact with Academic Supervisors depends on the wishes of the individual student and Academic Supervisor, but students should try to discuss progress with their Academic Supervisors at least once every 2 or 3 weeks, with more frequent discussions in the early stages. In the case of projects based in an external organisation, Academic Supervisors may visit the students in the organisation.

Students may ask their Academic Supervisors to read a draft of part of the dissertation, but it is up to the Academic Supervisor’s professional judgement as to how much of the dissertation he or she is willing to read. An Academic Supervisor cannot examine a dissertation before it is formally submitted and any comments which an Academic Supervisor makes on a draft are provisional in that the Board of Examiners may come to a decision which differs from that of the Academic Supervisor.

6.3 Assessment criteria

All dissertations are expected to conform to the following standards:

- The dissertation must add to the understanding of the dissertation subject.
- The dissertation must show awareness of the relevant literature.
- The dissertation must contain relevant analysis: an informed description of a problem is not sufficient.
- The dissertation must be presented using a satisfactory standard of English.

Students should immediately inform their Academic Supervisor and the Programme Director of any factors that will adversely affect their ability to work on their dissertation topic. Extenuating circumstances will be taken into account by the Board of Examiners, but this information must be available prior to the meeting of the Board. Exceptionally, it is possible for extensions to be granted if justified by illness or other personal problems. This can be done if relevant information is given in due course to the Academic Supervisor or the Programme Director.

6.4 Dissertation format

Dissertations should consist of the following:

- Title page with your NAME, EXAM NUMBER, PROGRAMME TITLE, DISSERTATION TITLE and YEAR
- Abstract
- Acknowledgements
- Own work declaration (signed and dated)
- Table of contents
- Main text (including introductory chapter and final chapter on conclusions and/or recommendations)
- Appendices (optional)
- Bibliography

The main text of the dissertation must not exceed 35 pages, based upon a 12-point font size and 1.0-line spacing. The main text referred to here, does not include such things as tables, graphs, figures, appendices and computer code. Dissertations must be type set on white A4 paper only. It may be printed either single- or double-sided. The following minimum margins must be observed.
The pages in the main text, appendices and bibliography must be numbered consecutively.

6.5 Submission of the dissertation

The dissertation must be submitted

- as a hardcopy via the AMS coursework box (situated outside the student office on the first floor of the Earl Mountbatten Building, EM 1.25)
- and electronically via the platform VISION (see section 4.9)

by the submission date specified to you.

7 Programme structure

7.1 Programme Induction dates

Programme Induction details at Heriot-Watt University:

<table>

### 7.1.2 Courses at Heriot-Watt University

Concerning the courses given at Heriot-Watt University, the following semester dates apply.

<table>
<thead>
<tr>
<th>2018/19 dates</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>3 – 7 September 2018</td>
<td>Welcome Week</td>
</tr>
<tr>
<td>10 September – 30 November 2018</td>
<td>Semester 1 teaching</td>
</tr>
<tr>
<td>3 – 14 December 2018</td>
<td>Semester 1 exams</td>
</tr>
<tr>
<td>17 December 2018 – 4 January 2019</td>
<td>Semester 1 break</td>
</tr>
<tr>
<td>7 January – 29 March 2019</td>
<td>Semester 2 teaching</td>
</tr>
<tr>
<td>1 April – 22 April 2019 (Easter: 21 April)</td>
<td>Semester 2 break</td>
</tr>
<tr>
<td>23 April – 17 May 2019</td>
<td>Semester 2 exams</td>
</tr>
<tr>
<td>20 May – 9 August 2019</td>
<td>Dissertation work / Revision</td>
</tr>
<tr>
<td>14 June 2019 (Scottish Borders Campus)</td>
<td>Graduations</td>
</tr>
<tr>
<td>18 – 21 June 2019 (Edinburgh Campus)</td>
<td>Graduations</td>
</tr>
<tr>
<td>1 – 9 August 2019</td>
<td>Resits</td>
</tr>
<tr>
<td>14 – 15 November 2019</td>
<td>Graduations</td>
</tr>
</tbody>
</table>

**Case Studies Dates:**

<table>
<thead>
<tr>
<th>2018/19 dates</th>
<th>Activity</th>

</tbody>
</table>

7.2 Examinations

Students must attend all examinations. The Registry will give details of the location of each examination once this is known. Information on the form of the examination will be given for each course. It is the student’s responsibility to check all relevant examination timetables.
For Heriot-Watt University examinations, please see the Registry web page https://www.hw.ac.uk/students/studies/examinations.htm

It is important that students do not make any travel arrangements until the final examination timetable has been published. However, please note that changes to the final timetable may still be required after it has been published due to circumstances beyond our control.

Students who do not attend an examination will be deemed to have failed. If there are special circumstances relating to the non-attendance, a Mitigating Circumstances (Special Circumstances) form and appropriate documentation must be submitted. Students will not be excused from the examinations because of holiday plans. **It is very important that you notify the Programme Director as soon as possible of any mitigating (special) circumstances (such as illness or death of a close relative) which could adversely affect your studies and/or examination performance.**

In the case of illness, a medical certificate must be supplied **as soon as possible** to the Programme Administrator. The Examiners will always take such circumstances into account where appropriate, but the later the notification, the less scope there is to do so. Notification of special circumstances must be given **before** the examination diet concerned.

Late notification will normally mean that no account can be taken of the circumstances. With regards to submission of project work, students are required to take reasonable precautionary measures to keep their work in progress safe such as regular backups of computer files.

Information on graduation can be found at: https://www.hw.ac.uk/uk/events/graduation.htm.

### 7.2.1 Dictionaries in Examinations

No student is permitted to take any dictionary into an examination without written permission. The only exception to the policy is in the case of individual students who had been assessed by the University's Disability Service as requiring access to a translation dictionary.

### 7.2.2 Calculators

Where a calculator is required for the completion of an examination, a student may use any basic scientific calculator, except the following: graphics calculator, programmable calculator and a calculator which features text storage or retrieval facilities, see https://www.hw.ac.uk/students/doc/approvedcalculatrguidance.pdf

### 7.2.3 Unauthorised material

You must not have any unauthorised electronic devices or pre-printed materials in the examination room. Cheating in an examination is treated very seriously by the University. If you do have any material relevant to the exam which you have brought in by mistake, you must hand it over to an invigilator before the start of the examination. Invigilators will carry out checks on authorised materials and calculators.

### 7.2.4 Re-Assessment Opportunities

Students will be able to be re-assessed in a **maximum of 3 courses**.
A student who has been awarded a Grade E or a Grade F in a course may be re-assessed in that course. A student who has been awarded a Grade D in a course may be re-assessed in that course in order to proceed to, or be eligible to receive the award of, Masters.

If you have already passed eight courses at D Grade or above but have not qualified for progression to the MSc (as your average in the best eight courses is lower than 50%) you may resit the exam in up to three courses where you achieved no more than a D Grade at first attempt in order to increase your average in the best eight courses and proceed to the MSc.

You must take the resit examinations at the next available opportunity. For most students this will be in the next academic session - December 2019 and/or April/May 2020. Only one resit opportunity will be permitted. All reassessment is based on examination results only, even in courses which include assessable coursework.

If you are required to be re-assessed before you are able to progress to the MSc Project Work and if you are in the UK on a Tier 4 Visa, the University is obliged to inform the UKVI that you will not be continuing with your project in the Summer of 2019 and therefore your visa will cancelled and you will be expected to leave the UK as soon as possible after the release of your results.

If you are not a UK resident you may be able to take the re-assessment exams off-campus i.e. in your home country. Further information on this will be provided to students at the relevant time.

Special arrangements may apply where a student has presented mitigating circumstances in relation to the first attempt. See the relevant section later in this Guide for more information.

Students who achieve the standards required to progress to the MSc following reassessment will be invited to return to the University in Summer 2019 to undertake MSc project work. We do not normally offer MSc supervision at other times of the year.

Students who fail to meet the standards required for the PG Diploma following reassessment may be awarded the PG Certificate in Actuarial Science provided they have they have met the requirements above.

8 Assessment requirements

The University operates Heriot-Watt Assessment and Progression System (HAPS) which specifies minimum progression requirements. Schools have the option to apply progression requirements above the minimum University requirement, which are approved by the Studies Committees. Students should refer to the programme specific information on progression requirements. This information is detailed below.

To determine the overall assessment of the taught component, courses are weighted. Courses can have weightings of 20 credits, 15 credits, 10 credits and 7.5 credits. The total weight of the core courses is 97.5. Students must choose optional courses having a total weight between 22.5 and 30 credits.
The overall mark for the taught component of the Programme is the credit weighted average over courses (core and optional courses). Sufficient conditions for the various awards that can be made are set out in the table below.

Upon completion of the taught component of the Programme, any student satisfying the conditions set out in the Taught Assessment Regulations, will be permitted to proceed to the dissertation.

Students can be permitted one re-assessment opportunity in a maximum of three taught courses. For more details please contact the Programme Director.

### Progression & Award Criteria

Students can register for a Masters or Diploma in Financial Mathematics. Students registered for the MSc degree need to satisfy certain progression criteria, enabling them to proceed onto the Dissertation. If they fail to meet these criteria, given below, they will graduate with a Diploma or Certificate, according to the circumstances.

<table>
<thead>
<tr>
<th>Weighted average mark</th>
<th>Dissertation</th>
</tr>
</thead>
</table>
| **MSc with Distinction** | At least 120 credits plus dissertation.  
| | Credit weighted average >=70% over all courses.  
| | All courses at grades A—C.  
| | Dissertation at grade A |

- At least 60 credits.
- Credit weighted average >=40% over 60 credits at grades A—E.

9 Individual course details

9.1 Core Courses

Brief details for the core courses are listed below, including the number of teaching hours and delivery period. For details of the syllabus and recommended texts for a particular course, please use the link for that course.

Stochastic Analysis in Finance
(20 credits, semester 1)
Aim: This course will provide and develop the key mathematical ideas which are used in derivative pricing. By spending a significant proportion of time on this particular topic it is hoped that the students develop a good understanding of the mathematics. This will provide a rigorous framework for the derivative pricing course enabling students to understand where the assumptions in the models break down.
Assessment: Stochastic Analysis in Finance will be assessed together by 100% exam.
https://www.macs.hw.ac.uk/students/ams/courses/f71fs-stochastic-analysis-in-finance/

Discrete-Time Finance
(10 credits, semester 1)
Aims: To introduce the basic probabilistic ideas and results needed for the later stochastic process and derivative pricing courses, in a discrete time setting. By the end of the course students will be expected to understand discrete martingale theory, its relationship with financial concepts such as arbitrage.
Assessment: Discrete-Time Finance will be assessed by 100% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f71dt-discrete-time-finance/

Financial Markets
(15 credits, semester 1)
Aims: The course is designed to give students a critical understanding of financial markets, the nature of assets traded in them, and the price-setting process. The course concentrates on equity and bond markets.
Assessment: Financial Markets will be assessed by 20% mid-semester coursework and 80% end of semester exam.
http://www2.hw.ac.uk/sml/postgraduate/2016-2017/courses/index.html

Derivatives Markets
(7.5 credits, semester 1)
Aims: This course provides an introduction to the traded and over-the-counter derivatives markets.
Assessment: Derivatives Markets and Derivative Pricing & Financial Modelling will be jointly assessed by 100% exam.
Derivative Pricing & Financial Modelling
(15 credits, semester 2)

Aims: The aim of this model is to study the application of the Black-Scholes model to the range of derivative securities encountered in the market, and to the term structure of interest rates. The principle tool will be the equivalent martingale measure. Links between derivative prices and PDEs will be indicated but solution of PDEs will be covered elsewhere. Discrepancies between the Black-Scholes model and market data will be described, and alternative models presented.

Assessment: Derivatives Markets and Derivative Pricing & Financial Modelling will be jointly assessed by 100% exam.

Credit Risk Modelling
(15 credits, semester 2)

Aims: This course will introduce students to quantitative models for measuring and managing credit risk. It also aims to provide students with an understanding of the credit risk methodology used in the financial industry and the regulatory framework in which the credit risk models operate.

Assessment: Credit Risk Modelling will be assessed by 100% exam.

9.2 Optional Courses

Brief details for optional courses are listed below, including the number of teaching hours and delivery period. For details of the syllabus and recommended texts for a particular course, please use the link for that course.

Statistical Inference
(7.5 credits, semester 1)

Aim: To provide postgraduate students with a broad knowledge of the principal areas of mathematical statistics and statistical methods widely used in actuarial science and finance. Students should have a good grounding in probability before commencement of this course.

Assessment: Statistical Inference will be assessed by 100% exam.

Statistical Methods
(15 credits, semester 1)

Aim: To provide postgraduate students with a broad knowledge of the principal areas of mathematical statistics and statistical methods widely used in actuarial science and finance.

Assessment: Statistical Methods will be examined by 100% exam.

Financial Econometrics
(7.5 credits, semester 2)

Aim: To introduce the methods of econometrics and their application to financial data.

Assessment: Financial Econometrics will be examined by 100% exam.
Numerical Techniques for Partial Differential Equations
(7.5 credits, semester 2)
Aim: To introduce students to numerical techniques for solving PDEs. In particular we study finite difference methods for the diffusion equation and other parabolic problems such as the Black-Scholes equation.
Assessment: Numerical Techniques for PDEs will be assessed by 100% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f71nt-numerical-techniques-of-partial-differential-equations/

Optimization Methods in Finance
(10 credits, semester 2)
Aim: This course will demonstrate how recent advances in optimization modelling, algorithms and software can be applied to solve practical problems in computational finance.
Assessment: Deterministic Optimization Methods in Finance will be assessed by 50% continuous assessment and 50% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f71om-optimization-methods-in-finance/

Portfolio Theory
(15 credits, semester 2)
Aim: To allow students to understand the theory of preference using utility theory and how this can be applied to selecting optimal portfolios. To show how portfolio selection models can be extended to become pricing models. To allow students to understand the basics of CAPM and APT.
Assessment: Portfolio Theory will be assessed by 100% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f71pt-portfolio-theoryf71ah-financial-economics-1/

Simulation
(10 credits, semester 2)
Aim: To give an introduction to the theory of Simulation with applications in Financial Mathematics and present some of the key techniques in the theory of numerical approximations for stochastic differential equations (SDE).
Assessment: Simulation will be assessed by 5% coursework and 95% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f70sb-simulation/

Stochastic Control and Dynamic Asset Allocation
(10 credits, semester 2)
Aim: The course introduces students to control theory and its applications in finance and economics, and it shows the connections between the following fields: controlled dynamical systems, optimization, nonlinear PDEs.
Assessment: Stochastic Control and Dynamic Asset Allocation will be examined by 100% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f71sc-stochastic-control-and-dynamic-asset-allocation/

Time Series Analysis
(7.5 credits, semester 2)
Aims: This course will introduce students to the main concepts underlying the analysis of time series, the involved statistical and mathematical tools and their applications in finance and actuarial science.
Assessment: Time Series Analysis will be examined by 100% exam.
http://www.macs.hw.ac.uk/students/ams/courses/f71ts-time-series-analysis/

10 Special Topics I & II

Special Topics consist of two courses (Special Topics 1 and 2) with a total of 15 credits. They are taken as guided reading courses in the last few weeks of each semester as announced in the programme’s timetable. In each semester, students choose 2 topics from a list which may vary from year to year. The topics are assessed by two oral presentations and two short written essays, respectively. The combined weight of the topics is 15 credits, each topic is worth 3.75 credits. Topics in Semester 2 are provided by industry.

The links to Special Topics:
Special Topics I: http://www.macs.hw.ac.uk/students/ams/courses/f71ta-special-topics-1/
Special Topics II: http://www.macs.hw.ac.uk/students/ams/courses/f71tb-special-topics-2/

11 Facilities

11.1 University library

The library facilities of the University of Edinburgh which are most likely to be relevant for the Programme are at

- Noreen and Kenneth Murray Library, King’s Buildings, West Mains Road, Edinburgh EH9 3JF
- Main Library, George Square, Edinburgh, EH8 9LJ.

The library of Heriot-Watt University is located at

- Edinburgh Campus, Cameron Smail Library, Gait 12.

11.2 Computer facilities

You will enrol as a user of the University computer network. This will give you an email account, and access to word-processing facilities and various packages which will be needed for some courses. Once you have completed on-line enrolment you will print out a letter which confirms your enrolment. Along with this letter are details of your University user name and password. Your user name will also be your email address, e.g. user name ab111 will have the email address ab111@hw.ac.uk

You will be credited with a printing quota for use over the year. While an additional allocation may be made in the summer for those proceeding to the MSc, you are advised to use your quota sparingly.
Abuse of the computing facilities will result, at the very minimum, in a ban from the facility.

Information about our Information Services can be found at: http://www.hw.ac.uk/is/guides/getting-started.htm

11.3 Careers service

The University of Edinburgh and Heriot-Watt University both have Careers Services that offer advice, information and practical help in all matters relating to the development of students’ future work or study plans. The Careers Service offices of the University of Edinburgh (see http://www.careers.ed.ac.uk/) are at

- Weir Building, West Mains Road, Edinburgh EH9 3JY, Tel: 0131 650 5773, Email: careers@ed.ac.uk.
- 33 Buccleuch Place, Edinburgh, EH8 9JS, Tel: 0131 650 4670, Email: careers@ed.ac.uk

The Heriot-Watt University Careers Advisory Service (see https://www.hw.ac.uk/study/why/careers-advisory-service.htm) is located at

- HWU Campus, Scott Russell Building, Room 1.13, Tel: 0131 451 3396

11.4 Travel

The easiest way to plan your journey to the campus is to use the Traveline Scotland Journey Planner (http://www.travelinescotland.com/welcome.do), which uses up-to-date public transport timetables.

Find out more about getting around in Edinburgh at http://www.hw.ac.uk/student-life/edinburgh/getting-around.htm.

Use our detailed campus maps to help you find your way around the buildings on Heriot-Watt campus (http://www.hw.ac.uk/student-life/campus-life/edinburgh/edinburgh-campus-map.htm) and on University of Edinburgh campus (http://www.maths.ed.ac.uk/contact/travel-directions).

Disabled access
Visit our pages on the DisabledGo website (http://www.disabledgo.com/organisations/heriot-watt-university/main-2) or their mobile site (http://m.disabledgo.com/organisations/heriot-watt-university/main-2) for details of disabled access features at our Edinburgh Campus. The guides describe your journey into and throughout the campus buildings – accommodation, library, catering, teaching spaces etc – and includes photographs of the features covered.

Bicycle
There are safe cycle routes to the Heriot-Watt Campus from the city centre, Edinburgh Park and the west. These either follow the main roads or the cycle paths along the Union Canal. You can plan your journey on the CycleStreets website (http://www.cyclestreets.net/journey/to/EH14+4AS/).

Bus
Lothian Buses ([http://lothianbuses.com/](http://lothianbuses.com/)) offers local bus services 25, X25, 34, 35, 45, 63 and N25/N34 (night bus) to the Heriot-Watt Campus. Service 25 is the most frequent, leaving the city centre every 10 minutes during the day, and every 15 minutes after 8.00pm. The journey takes about 30–40 minutes from the city centre.

For travelling from Heriot-Watt campus to the University of Edinburgh's King's Buildings campus, a recommendable option is to take bus 25 to ‘opp Salvation Army Hall’, then switch to bus 38, and finally get off at ‘before Mayfield Road’, which takes less than one hour including walking to King’s Buildings. For further options see Lothian Buses.

Single fares are £1.70 and a day ticket costs £4.00. With a single fare you are not allowed to change buses. For travelling between Heriot-Watt campus and the University of Edinburgh's King's Buildings campus you need to change busses, so a day ticket is cheaper than buying single fares. Note that exact money is required for Lothian Buses (with the exception of Airlink) but you can pay for tickets using your mobile phone ([http://lothianbuses.com/apps](http://lothianbuses.com/apps)). Regular travellers to the campus should consider getting a Ridacard ([http://lothianbuses.com/tickets/ridacard](http://lothianbuses.com/tickets/ridacard)).

**PART B: UNIVERSITY INFORMATION**

The Academic Registry is responsible for producing Part B of the handbook to provide information and assistance on University policies and support services.

Please note that the following sections are standard sources of information provided to all students. However, certain aspects are programme-specific and you should refer to Part A where directed. Students are advised that the University will make changes to study programmes and progression requirements from time to time in accordance with strategic developments and it is therefore important to ensure that you check the most recent version of the handbook for up-to-date information.

**B1. Our Values**

At Heriot-Watt, we have an established set of values that help up to nurture innovation and leadership and show our commitment to continuous development in all our activities. They are:

- Value and Respecting Everyone
- Pursuing Excellence
- Pride and Belonging
- Shaping the Future
- Outward Looking

Find out more about the [Heriot-Watt values](#) and what they mean to us.

**B2. Student Learning Code of Practice**
The Student Learning Code of Practice outlines information about the University, its culture, policies, regulations and the expectation for students and staff. Please familiarise yourself with the relevant Code that is located within the Learning and Teaching Policy Bank.

B3. University Policies and Support Services

Heriot-Watt University has a detailed set of rules that governs the operation and management of University business. These are referred to as Ordinances and these Ordinances are set by the Court, which is the governing body of the University. The Ordinances provide a regulatory framework for corporate governance. The University Ordinances are supported by University Regulations which provide a regulatory framework for the governance of academic-related matters which staff and student must adhere to for all academic matters. Wherever practicable, University policy is designed to include all members of the University’s community, both within and outwith the main campus environments.

Read more about the University Policies, Ordinances and Regulations.

As part of your University enrolment, you signed the Student Declaration and agreed to abide by the regulations of the University and conform to its policies, procedures, ordinances and regulations that underpin the Ordinances and Regulations. During your time at Heriot-Watt, the following policies, procedures, reference information and support services may be relevant and useful guidance for you.

B4. Your Student Portal

The Student Portal brings together your services and relevant information in one place. Below is a summary of the services available to you via the portal:

- **Office 365 suite**: through single sign-on, all of your Office 365 services will be accessible through the Portal.
- **Library**: whether you want to search for books or view your loans & reservations, the Portal allows you to do this on your phone or desktop.
- **Vision**: your Portal will present you with announcements and tasks related to this course.
- **Student Information**: all university-level regulations and policies relating to your studies can be found on the Portal.
- **Campus and School News**: the Portal enables the University to promote events and experiences which will help you develop your skills.
- **Personalised**: You can hide, add and move tiles on your dashboard.
- **AskHWU**: You can find everything you need to help you navigate your time at HWU through the new AskHWU search tile. Ask questions of the University and enquire directly with members of staff to get information about exams, enrolment, careers, wellbeing services and much more.

You can access your student portal [here](#).
## B5. Quick Finder Guide to Academic and Support Services

The following provides an A-Z guide on the academic and support services available to you during your studies.

By clicking on the subject heading you will link to the relevant information in the student portal/website. Please ensure that you check the portal/web at the regular times throughout the year for the most up-to-date information:
